Decision for "R" or "L":

If "R" in the description of a part stands for the Right hand side of the left hand side which is decided by the forward direction of travel of the vehicle.

3. Model Application—Model application for the various models listed within the catalog. Single model applications will not require this section.

Model Year Guide—A guide to the part application (prior to 1976 the guide reference is the model designation ie. K0, K1 etc.). For 1976 and above the guide reference is the last digit of the model year ie. 1976 = 6; 1977 = 7; 1985 = 5 etc.). Other unique designations may be used in catalogs listing different models.

4. AREA CODE—Area codes for parts that are unique to a particular area. Area codes are defined in the Serial Number application chart when applicable. This column will not be used in catalogs which do not include unique area codes.

5. SERIAL NUMBER—Applies to Engine or Frame serial numbers depending on the section.

The serial number of the vehicle (frame, engine, carburetor) should be checked prior to ordering parts for a specific unit. In cases where a part has been modified, the serial number of the vehicle bearing the modification is listed in the 'SERIAL NUMBER' column.

The modification parts are controlled by each pertinent serial number below.

Engine serial number - Engine group parts (Block numbers beginning with '1')

Carburetor identification number - Carburetor component parts

Frame serial numbers - Frame group parts (Block numbers beginning with 'F')

HOW TO USE THIS CATALOG

Serial number application chart and Serial number locations are provided.

Note: Some models may be controlled by one serial number only.

6. QTY REQ—Quantity required per unit as specified.

A. 'AR' in place of the quantity indicates AS REQUIRED.

B. '()' Parenthesis in the quantity required column indicates 'optional' (only the open parenthesis will appear if the quantity required is over 9).

7. PART NUMBER—Part number corresponding to the reference numbers and application. Several part numbers may be listed under one (1) reference number. For your convenience the current supersede chain, as of print date, has been listed for you. Supersede chains are subject to change without notice.

MAKE-UP OF PART NUMBERS

All parts are classified into two groups consisting of 'GENERAL PARTS' and 'STANDARD PARTS'. All parts are numbered in accordance with system described below:

* The color code at the end of a General Part's part number indicate the color. However, color codes such as ZA, ZB, ZC onward except ZZ, do not indicate the color directly but refer to the notes "A" through "Z" in the Description Column of this Parts Catalog Microfiche. If the color description is not indicated in the description, refer to the color table.

8. H/C—The Honda Code is listed to the right of each Part Number.
