

FEATURES

- T8 optimized fluorescent lensed troffer
- Shallow design frees up plenum space
- Hemmed fixture edges reduce risk of injury during fixture handling and installation
- Integral T-Bar clips quickly to secure fixture to the grid
- Metal to metal light leak protection on all four sides of shielding frame
- Snap-in ballast cover requires no tools for wireway access
- T-hinging for easy insertion and removal of shielding frame from either side of the housing
- Flush steel shielding frame is equipped with simple-to-use corner tabbing for diffuser replacement
- Housing embossments provide extra strength and rigidity

PROJECT INFORMATION

POPEYE'S

Project Name
JT824332GFSA123EU

Catalog No.

A

Type

Date

HOUSING

Heavy gauge steel. Die formed for extra rigidity. Designed for installation in standard inverted tee grid ceilings.

BALLASTS

Energy-efficient, T8 electronic, thermally protected, automatic resetting, Class P, high power factor, sound rated A, unless otherwise specified. Generic ballasts may be supplied by a wide variety of reputable vendors. For a specific vendor and/or ballast, specify as option. CEE NEMA Premium compliant.

ELECTRICAL

Standard class "P," thermally protected, autoresetting HPF ballast, sound rated A. CEE NEMA Premium compliant. All ballast leads extend a minimum of 6" through access location. NEC/CEC-compliant ballast disconnect is standard.

FINISH

All metal parts are processed with a 5-phase phosphate bonding treatment. Grid units are pre-painted with high gloss baked white enamel, 86% reflective. Polyester powder coat paint after fabrication (PAF) option available, reflectance 90%.

SHIELDING

100% virgin acrylic prismatic 12, extruded and roll-embossed, diagonally oriented female prisms standard. Other shielding may be specified. If desired shielding media is not shown, contact your local Columbia Lighting representative.

CERTIFICATION

All luminaires are built to UL 1598 standards and bear appropriate UL and cUL or CSA labels. Damp location labeling is standard. Emergency-equipped fixtures labeled UL 924.

CEILING COMPATIBILITY

Available to fit most standard ceiling types as shown at left. For information on compatibility with specific ceilings, contact your local Columbia Lighting representative.

Luminaire Efficacy Rating (LER)	73
IESNA RP-1-2004 Compliance	Non-Compliant
Comparative Yearly Lighting Energy Cost per 1000 Lumens	\$3.29 based on 3000 hrs. and \$0.08 per KWH

DIMENSIONAL DATA

A: 3/8" Diameter knockout
K: 2" x 3" through hole for access plate.

NOTE: All dimensions are in inches; dimensions and specifications are subject to change without notice. Please consult factory or check sample for verification.

CEILING COMPATIBILITY

For lay-in installation in exposed grid ceilings. Maximum tee widths of 1" and maximum tee heights of 2" allowed.

For hard ceiling applications order FK24 flange kit. Flange kit wires directly into concealed ceiling opening for a clean, finished appearance.

Row cut out dimensions using FK24 & FKCR adapters:
Width 24 3/8", Length [48" x (# in row)] + 3/8". Example: (48" x 2) + 3/8" = 96 3/8"

Flange kit rough in dimensions for single unit only: 24 3/8" x 48 3/8"

For flanged fixtures in row configurations, the FKCR adapter bracket kit is required in addition to the FK24 kit. Order one less FKCR than the total number of fixtures in row. (Example: Row of two, order (2) FK24 & (1) FKCR)

Also available with 12, 16, 24, or 32 cells

FEATURES

- Nominal 3" deep louver
- Black reveal with full air handling capabilities
- Matte anodized low iridescent, semi-specular (MA) louver finish virtually eliminates visibility of fingerprints and construction dust
- Shallow housing height
- Lightweight

PROJECT INFORMATION

POPEYE'S

Project Name

P4D-24-332G-MA36-S-3UE

Catalog No.

B

Type

Date

CONSTRUCTION

Luminaire housing and end caps are die formed code gauge cold rolled steel. Louver is formed from DuraLouver® anodized aluminum and secured in open or closed position by die formed steel hinges. Louver hinges from either side. Mechanical light trap prevents light leaks. Latches are finger-tip actuated, positive feed type, fabricated of spring steel, and completely concealed in the black reveal.

FINISH

Parts are treated with a five stage phosphate bonding process and finished with a high temperature baked white enamel. For post painted housing, suffix catalog number with PAF. Regressed slots are flat black. Anodized aluminum DuraLouver standard finish is matte anodized low iridescent (MA). Also available in low-iridescent semi-specular natural anodized aluminum (LD) or low-iridescent specular aluminum (LS).

AIR HANDLING

All supply/return and air extract functions are available as a specified option. Directional control vanes and/or extract damper features available. Air extract slots are located out of sight in end caps. See air removal data on reverse.

INSTALLATION

An access plate is furnished with each luminaire for fast wiring access from the plenum. No need to open fixture.

Product ships standard with mylar dust cover to eliminate job site contamination.

BALLASTS

Energy efficient, thermally protected, automatic resetting, Class P, high power factor, sound rated A, magnetic or electronic ballasts. CEE NEMA Premium compliant.

ELECTRICAL

Standard class "P", thermally protected, autoresetting HPF ballast, sound rated A. CEE NEMA Premium compliant. All ballast leads extend a minimum of 6" through access location. NEC/CEC-compliant ballast disconnect is standard.

CEILING COMPATIBILITY

Luminaire is available to fit exposed grid ceilings. For hard ceilings order accessory flange kit. Some options may increase fixture depth. For information on compatibility with specific ceilings, or where plenum depth is a problem, contact your Columbia representative. Four integral T-bar clips are standard. Two or four non-integral T-bar clips are available as an option.

CERTIFICATION

All luminaires are built to UL 1598 standards and bear appropriate UL and cUL or CSA labels. Damp location labeling is standard. Emergency-equipped fixtures labeled UL 924.

NOTE: All dimensions are in inches; dimensions and specifications are subject to change without notice. Please consult factory or check sample for verification.

CEILING COMPATIBILITY

Type G

For lay-in installation in exposed grid ceilings. Maximum tee widths of 1" and maximum tee heights of 2" allowed.

FK24 Flange Kit

For hard ceiling applications order FK24 flange kit. Flange kit wires directly into concealed ceiling opening for a clean, finished appearance.

FKCR

For flanged fixtures in row configurations, the FKCR adapter bracket kit is required in addition to the FK24 kit. Order one less FKCR than the total number of fixtures in row.
(Example: Row of two, order (2) FK24 & (1) FKCR)

Row cut out dimensions using FK24s & FKCR adapters:
Width 24 3/8", Length [48" x (# in row)] + 3/8". Example: (48" x 2) + 3/8" = 96 3/8"

Flange kit rough in dimensions for single unit only: 24 3/8" x 48 3/8"

PROJECT INFORMATION

POPEYE'S

Project Name
ST814232FFSA12EU

Catalog No.

B1

Type

Date

FEATURES

- Optical performance designed for T8 and T5 lamp technology
- Mechanical light seal
- Mitered corners on door present a clean uninterrupted appearance
- Spring loaded latches optional
- Rolled fixture edges reduce risk of injury during fixture handling and installation
- Integral T-Bar clips quickly secure fixture to grid system without the need for time consuming loose parts
- Snap-on ballast covers can be removed with lamps installed
- Corner hinging for easy insertion and removal of door frame from either side
- Optional flush or regressed aluminum shielding frames available with positive action or spring loaded latches
- Housing ends secured by unique corner interlock and screws
- Available with exclusive wiHUBB technology preinstalled
 - Peer to peer, self-healing wireless mesh network
 - Integrated control system for 0-10VDC or step dimming, or On/Off

FLANGED FEATURES

Four adjustable Uni-Lugs for quick easy installation. Optional plaster frames available for individual or row mounting. Fixture end flanges are removable for row mounting. Joiner cables are included.

HOUSING

Heavy gauge steel. Die formed for extra rigidity. Designed for installation in standard inverted tee grid ceilings.

BALLASTS

Energy efficient, thermally protected, automatic resetting, Class P, high power factor, sound rated A, unless otherwise specified. CEE NEMA Premium compliant.

ELECTRICAL

Standard class "P," thermally protected, autoresetting HPF ballast, sound rated A. CEE NEMA Premium compliant. All ballast leads extend a minimum of 6" through access location. NEC/CEC-compliant ballast disconnect is standard.

FINISH

All metal parts are processed with a five phase phosphate bonding treatment. Grid units are pre-painted with high polyester baked white enamel, 86% reflective. Flanged units are painted after fabrication with a polyester powder coat, reflectance of 90%.

SHIELDING

100% acrylic prismatic, extruded and roll-embossed, diagonally oriented female prisms, unless otherwise specified.

CERTIFICATION

All luminaires are built to UL 1598 standards and bear appropriate UL and cUL or CSA labels. Damp location labeling is standard. Emergency-equipped fixtures labeled UL 924.

UNIT

- Damp location rated
- Easy to install, snap together design
- Injection-molded, UL94 V-0 flame rated, high impact, thermoplastic housing
- Molded wireways for internal wire routing and connections
- Completely self-contained
- 6 volt, 5.4 watt high intensity tungsten (H.I.T.) lamps
- Remote capacity option provides 12 watts of remote power
- Available in white or black finishes
- Universal J-Box mounting pattern
- 120/277 VAC dual input
- Short circuit, voltage surge, brown-out and low battery voltage disconnect protected
- LED charge rate/power on indicator light
- Push test switch
- Meets ADA fixture requirements
- Long life maintenance-free sealed lead acid battery
- 90 minute ETL listed emergency run time

EXIT SIGN

- Factory assembled unit/LED exit sign
- Constant uniform illumination
- 6" letter with a 3/4" stroke
- Long-Life, high intensity, red or green LEDs
- Color matched diffuser for optimal light output
- Snap-in chevron type directional arrows
- Universal mount, canopy included

VEX-U-BP-WH-EL90

Exclusive low-profile design allows for mounting above doors and restricted spaces. The EL90 offers full 180° lamp rotation.

DIMENSIONS

CONFORMANCE TO CODES & STANDARDS

ETL listed. Meets UL 924, NFPA 101 (Life Safety Code) NEC, and OSHA. Meets state of Minnesota energy-efficient legislation requiring less than 20 watts of power consumption.

SPECIFICATIONS ARE SUBJECT TO CHANGE WITHOUT NOTICE

CONSTRUCTION

Unit & Lamp Housing: Precision molded housings constructed of flame retardant, corrosion proof, UV stable thermoplastic. N.F.P.A. approved field selectable chevrons. Units resist denting, peeling, scratching and corrosion.

Finish: Textured white or black.

EXIT ILLUMINATION

Fully illuminated 6" letters with 3/4" stroke is achieved with high output, long lasting red or green Light Emitting Diodes (LEDs). An exclusive color-matched diffuser eliminates hot spots and striations, providing optimal light output. LEDs and electronics have an expected service life of up to 100,000 hours.

INSTALLATION

Simple snap together universal design allows for faceplate and backplate to be fully interchangeable. Mounting canopy is supplied with all signs and snaps into enclosure with two positive locking tabs.

ELECTRONICS

120/277 VAC dual voltage input with surge protected, solid state circuitry.

EMERGENCY OPERATION

Charging circuit is solid state type with constant current charge and transfer design. Circuit is brown-out protected and provides a minimum of 90 minutes of emergency run time and recharge time of 12 hours. Push to test switch and an LED AC indicator provides simple means for manual test.

REMOTE CAPACITY OPTION

The EL90 is available with an additional 12 watts of remote capacity and is supplied with 5.4 watt lamps. This option utilizes maintenance-free, sealed lead acid batteries with an estimated service life of 10 years with an operating temperature range of 65°F (19°C) to 85°F (30°C).

SELF-TESTING /

SELF-DIAGNOSTIC OPERATION (Option: G2)

The circuit continuously monitors the operating condition of the AC power, battery supply voltage, emergency lamp continuity and charging circuit.

If a failure is detected, visual status will occur immediately via the multi-colored LEDs. LED indicator(s) will illuminate until fault has been corrected.

The G2 also monitors the transfer circuit as well as performing automatic code compliant testing. The self-test will operate the equipment in emergency mode five minutes every 28 days. Also, a 90 minute full-function test is performed every six months.

WARRANTY

Any component that fails due to manufacturer's defect is guaranteed for 5 years from time of shipment. Battery is prorated for 5 years. Warranty does not apply to damages caused by improper installation, abuse, fire or acts of God. Manufacturer reserves the right to charge for such repairs if deemed necessary.

SWP SERIES WALL PACK

The rugged SWP Series wall pack is the perfect solution for compact, reliable illumination. Its low profile provides unobtrusive, yet functional perimeter lighting around parking garages, retail buildings, restaurants, and service areas. Our variety of standard, in-stock color options allow this industry standard luminaire to become an aesthetic design element that will complement any building decor.

Fixture Specifications

FEATURES

- Rugged die cast aluminum housing finished in weatherproof powder-coat paint
- Hinged door frame for easy lamp replacement
- Heavy-duty prismatic borosilicate glass refractor for non-yellowing maximum performance

- UL listed for wet locations
- In stock; immediate availability in a variety of colors

STANDARD FEATURES

- Damp location rated
- Universal J-box mounting with quick-connect adapters for fast, simple installation
- Compact, low profile design
- Unique, fully adjustable square lamp heads
- Completely self-contained
- Fully automatic operation
- 6-volt premium grade, lead-acid, maintenance-free battery with 10 year expected life (optional NiCad battery available)
- Environmentally coated, solid state charger
- Low voltage disconnect, protects battery from deep discharge
- 120/277 VAC operation
- Fully adjustable 5.4 watt tungsten (LL90) or 5 watt halogen (LL90H) glare-free lighting heads (optional Krypton lamps available)
- Injection-molded, V-0 flame retardant, high impact, thermoplastic housing
- Low-profile test switch and LED charge rate indicator light
- Regulated charge voltage
- AC lockout
- Overload/short circuit protection
- Brown-out protection
- ETL listed

LL90R REMOTE CAPACITY FEATURES

- Remote capabilities with a total of 11 watts
- 6 volt, 7ah lead-acid battery
- Same low-profile design as LL90

The LL90, LL90R, and LL90H combine a low-profile, contemporary appearance with economy and dependability. Both incorporate fully adjustable designer heads to compliment any environment.

6" VERTICAL COMPACT FLUORESCENT HOUSING

26/32/42W
COMPACT FLUORESCENT LAMP

PL642EU

PRODUCT DESCRIPTION

PL housing designed for use in non-insulated areas • If installed where insulation is present, the insulation must be pulled back 3" from all sides of the PL housing • Easy access ballast.

PRODUCT SPECIFICATIONS

Lamp One 26/32/42W triple tube (4-pin) CFL lamp.

Socket Supplied with spring to accommodate certain trim installations, or can be attached to top of housing for certain trims.

Ballast 120V thru 277V HPF Rapid Start Electronic with end-of-life lamp protection • UL listed/CSA certified • Mounted between j-box and housing for ease of maintenance.

Trims Trim selection shown on reverse.

Labels UL listed for through-branch wiring and damp locations • Union made • UL and C-UL Listed • Trims 220, 239, 241, 242, 243, 271, 6101 and 9900 are wet location approved for covered ceiling applications.

Testing All reports are based on published industry procedures; field performance may differ from laboratory performance.

Product specifications subject to change without notice.

INSTALLATION

Real Nail 3 Bar Hangers Telescoping, patent-pending Real Nail 3 system permits quick placement of housing anywhere within 24" O.C. joists or suspended ceilings • Integral T-bar notch and clip secures housing in suspended ceiling grid – no accessory clips required • 24" expansion stop allows quick placement of fixture in standard grid spacing • Bars scored in two locations for fast, clean breaking, allowing housing installation in tight applications • Bars captive to mounting frame • Edge-mounted for extra strength • Captive bugle-headed ring shank nail for quick one-step installation and easy removal with claw hammer for fixture relocation • Quick-Loc slot and oversized locking set screw lock fixture in position • Bar hanger foot contoured to align to bottom of construction joist • Alternate mounting holes included.

Junction Box Pre-wired junction box provided with (5) 1/2" and (1) 3/4" knockouts, (4) Non-metallic sheathed cable connectors and ground wire, UL and C-UL Listed for through-branch wiring, maximum (8) No. 12 AWG 90° C branch circuit conductors (4 in, 4 out) • Junction box provided with removable access plate • Knockouts equipped with pryout slots.

Mounting Frame 22-gauge die-formed galvanized steel mounting frame • Rough-in section (junction box, mounting frame, housing ballast and bar hangers) fully assembled for ease of installation.

Housing 22-gauge white painted steel • Housing is vertically adjustable to accommodate up to a 2" ceiling thickness.

LAMP USED IS A 15 WATT COMPACT FLUORESCENT

ASB SERIES

A fully adjustable and directional lighting system designed for maximum flexibility and the challenges of today's lighting needs. Adjustable mounting allows for up to 45° tilt above horizontal to optimize performance. Fixed arm mounting provides true cutoff in the same value-priced luminaire.

Fixture Specifications

FEATURES

- Mill finished aluminum housing
- Access to lamp and ballast compartments through hinged door assembly
- One-piece tempered glass lens
- Optical system fabricated of polished aluminum; provides optimum efficiency for long and wide light distributions
- Type C includes adjustable tenon adapter
- Includes integral/adjustable light cut-off shield
- Consult factory for external glare shield options
- Includes lamp
- Available with photocell
- Available with polycarbonate shield
- Suitable for wall mounting
