Terracon Project No. J6217094

Dear Ms. Damron:

Terracon Consultants, Inc. (Terracon) is pleased to submit the enclosed Phase I Environmental Site Assessment (ESA) report for the above-referenced site. This assessment was performed in accordance with Terracon Proposal No. PJ6217094 dated December 27, 2021.

We appreciate the opportunity to be of service to you on this project. In addition to Phase I services, our professionals provide geotechnical, environmental, construction materials, and facilities services on a wide variety of projects locally, regionally and nationally. For more detailed information on all of Terracon's services please visit our website at www.terracon.com. If there are any questions regarding this report or if we may be of further assistance, please do not hesitate to contact us.

Sincerely,
Terracon Consultants, Inc.

Lizett Jimenez

EXECUTIVE SUMMARY

This Phase I Environmental Site Assessment (ESA) was performed in accordance with Terracon Proposal No. PJ6217094 dated December 27, 2021 and was conducted consistent with the procedures included in ASTM E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The ESA was conducted under the supervision or responsible charge of Chris C. Langewisch, Environmental Professional. Lizett Jimenez performed the site reconnaissance on January 18, 2022.

Findings and Opinions

A summary of findings is provided below. It should be recognized that details were not included or fully developed in this section, and the report must be read in its entirety for a comprehensive understanding of the items contained herein.

Site Description and Use

The site consists of an approximate 1.5-acre portion of a larger approximate 8.2-acre parent parcel located at 108 Egg Harbor Road in Sewell (Washington Township), Gloucester County, New Jersey. Specifically, per the client's request, the site encompasses the southwestern portion of the parent parcel, which was identified as the location of the proposed Burger King and associated parking lot. The site currently consists of a vacant, unpaved area. According to the online Gloucester County records, historical aerial photographs, and an interview with a manager at County Conservation Company (the parent parcel owner and occupant of the remainder of the parent parcel), the site has not been utilized by County Conservation Company since approximately 2019. As such, current site operations were not observed at the time of the site reconnaissance.

Historical Information

Based on the historical site information, structures were not depicted on the site from as early as 1891 through 1920. By 1931, the site appeared to consist of undeveloped agricultural land. By 1962, a majority of the site appeared to consist of a shallow pit presumably associated with mining and/or gravel pit operations to the northeast/east of the site. However, by 1965, the site appeared to have been backfilled. By 1995, vegetation appeared to have grown sporadically throughout the site. The site appeared to consist of soils and/or stone materials in two large piles as early as 2006. Decorative trees appear to line the southwestern boundary. According to the city directories obtained from EDR, Five Points Landscaped Products occupied the parent parcel in 2000. Additionally, County Conservation Company was listed as an occupant of the parent parcel in 2005 and 2010. Significant changes were not evident through 2017.

The site consisted of agricultural land from as at least 1931 to approximately the early 1960s. It should be noted that based on the agricultural usage of the site, pesticides and herbicides may have been used historically. A review of the historical site information did not indicate the storage

Phase I Environmental Site Assessment

Proposed Burger King – Sewell, NJ ■ Sewell (Washington Township), NJ
January 27, 2022 ■ Terracon Project No. J6217094

of chemicals or petroleum, and no indication of a release on the site was identified. Therefore, the historical agricultural activities at the site is not considered a REC at this time.

Additionally, evidence of excavation activities was observed at the site during the early 1960s and appears to be associated with the sand pit to the northeast of the site. By 1965, these activities appeared to have ceased and the surrounding area appears to have been backfilled. Terracon notes that site underwent extensive excavation activities sometime in 2019 during the development of Blackwood Barnesboro Road. Additionally, Terracon observed the approximate location of the historic excavation activities and did not observe evidence of disturbed soils in the area during the site reconnaissance. As such, the excavation and backfilling activities during the 1960s do not constitute a REC for the site.

Records Review

The site was identified in the ECHO, NJEMS, and NPDES databases under the facility name Wawa. The listings pertain to a Construction Activity Stormwater General Permit issued to the site in the New Jersey Pollutant Discharge Elimination System (NJPDES) in September 2020. Additional details were not provided. Based on a conversation with Mr. Tuncredi, manager at the parent parcel, Blackwood Barnesboro Road was developed on the parent parcel circa the end of 2020. Based on the limited information, Terracon presumes the general permit pertains to the development of Blackwood Barnesboro Road. As such, the identified listings do not constitute a REC for the site.

Additionally, Terracon also searched the NJDEP DataMiner database for well permits. NJDEP DataMiner identified two groundwater monitoring wells installed at the western portion of the parent parcel. MW-2 was installed on November 19, 2018. Please note, MW-2 appears to be located a few feet from the northern site boundary. MW-3 was installed on November 20, 2018. Please note, this monitoring well was observed approximately 150 feet north-northwest of the site during the site reconnaissance. Additional information regarding the onsite monitoring wells was not provided. Based on the lack of recorded releases at the site/parent parcel, the monitoring wells do not constitute a REC for the site at this time. However, based on additional research of the surrounding area, the monitoring wells may be associated with an active groundwater contamination investigation occurring at the southwestern adjoining property. Please refer to Section 5.0 for details concerning the southwestern adjoining property for more details. At this time, the lack of groundwater data collected from the monitoring wells constitutes a significant data gap.

Site Reconnaissance

The site was observed to be an unoccupied, unpaved area. Site observations include a sanitary sewer manhole on the southwestern corner of the site. As aforementioned, groundwater monitoring wells were observed on the parent parcel during the site reconnaissance. At this time, the lack of groundwater data collected from the monitoring wells constitutes a significant data gap at this time.

Phase I Environmental Site Assessment

Proposed Burger King – Sewell, NJ ■ Sewell (Washington Township), NJ
January 27, 2022 ■ Terracon Project No. J6217094

Adjoining Properties

The site was observed to be located in a commercial area within Gloucester County, New Jersey. The site is bordered by a vacant and unpaved area of the parent parcel to the northwest, followed by a residence; by Blackwood Barnsboro Road, followed by the parent parcel occupied by County Conservation to the east; and by Egg Harbor Road followed by Xpressmart and an Exxon gas station to the southwest.

Significant Data Gaps

At this time, the lack of groundwater data collected from the monitoring wells observed on the parent parcel constitutes a significant data gap.

Conclusions

We have performed a Phase I ESA consistent with the procedures included in ASTM Practice E 1527-13 at 108 Egg Harbor Road, Sewell (Washington Township), Gloucester County, New Jersey, the site. Recognized Environmental Conditions (RECs) or Controlled RECs (CRECs) were not identified in connection with the site.

Recommendations

Based on the scope of services, limitations, and conclusions of this assessment, Terracon did not identify RECs or CRECs. However, Terracon recommends conducting a file review with the NJDEP to review any available data concerning the groundwater monitoring wells at the parent parcel.

1.0 INTRODUCTION

1.1 Site Description

Site Name	Proposed Burger King – Sewell, NJ
Site Location/Address	108 Egg Harbor Road, Sewell (Washington Township), Gloucester County, New Jersey (Block 7, Lot 6.02)
Land Area	Approximately 1.5 acres
Site Improvements	The site consists of an unoccupied and unpaved area.
Anticipated Future Site Use	Redevelopment for commercial use
Purpose of the ESA	Acquiring the site

The location of the site is depicted on Exhibit 1 of Appendix A, which was reproduced from a portion of the USGS 7.5-minute series topographic map. The site and adjoining properties are depicted on the Site Diagram, which is included as Exhibit 2 of Appendix A. Acronyms and terms used in this report are described in Appendix F.

1.2 Scope of Services

This Phase I ESA was performed in accordance with Terracon Proposal No. PJ6217094 dated December 27, 2021 and was conducted consistent with the procedures included in ASTM E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The purpose of this ESA was to assist the client in developing information to identify RECs in connection with the site as reflected by the scope of this report. This purpose was undertaken through user-provided information, a regulatory database review, historical and physical records review, interviews, including local government inquiries, as applicable, and a visual noninvasive reconnaissance of the site and adjoining properties. Limitations, ASTM deviations, and significant data gaps (if identified) are noted in the applicable sections of the report.

ASTM E1527-13 contains a new definition of "migrate/migration," which refers to "the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface." By including this explicit reference to migration in ASTM E1527-13, the Standard clarifies that the potential for vapor migration should be addressed as part of a Phase I ESA. This Phase I ESA has considered vapor migration in evaluation of RECs associated with the site.

1.3 Standard of Care

This ESA was performed in accordance with generally accepted practices of this profession, undertaken in similar studies at the same time and in the same geographical area. We have endeavored to meet this standard of care, but may be limited by conditions encountered during performance, a client-driven scope of work, or inability to review information not received by the report date. Where appropriate, these limitations are discussed in the text of the report, and an evaluation of their significance with respect to our findings has been conducted.

Phase I ESAs, such as the one performed at this site, are of limited scope, are noninvasive, and cannot eliminate the potential that hazardous, toxic, or petroleum substances are present or have been released at the site beyond what is identified by the limited scope of this ESA. In conducting the limited scope of services described herein, certain sources of information and public records were not reviewed. It should be recognized that environmental concerns may be documented in public records that were not reviewed. No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs. No warranties, express or implied, are intended or made. The limitations herein must be considered when the user of this report formulates opinions as to risks associated with the site or otherwise uses the report for any other purpose. These risks may be further evaluated – but not eliminated – through additional research or assessment. We will, upon request, advise you of additional research or assessment options that may be available and associated costs.

1.4 Additional Scope Limitations, ASTM Deviations and Data Gaps

Based upon the agreed-on scope of services, this ESA did not include subsurface or other invasive assessments, vapor intrusion assessments or indoor air quality assessments (i.e. evaluation of the presence of vapors within a building structure), business environmental risk evaluations, or other services not particularly identified and discussed herein. Credentials of the company (Statement of Qualifications) have not been included in this report but are available upon request. Pertinent documents are referred to in the text of this report, and a separate reference section has not been included. Reasonable attempts were made to obtain information within the scope and time constraints set forth by the client; however, in some instances, information requested is not, or was not, received by the issuance date of the report. Information obtained for this ESA was received from several sources that we believe to be reliable; nonetheless, the authenticity or reliability of these sources cannot and is not warranted hereunder. This ESA was further limited by the following:

- Terracon requested documents from state and local agencies; however, a response was not received by the issuance of this report. Specifically, data concerning the groundwater monitoring wells advanced at the parent parcel was not received. At this time, the lack of groundwater data collected from the monitoring wells constitutes a significant data gap.

An evaluation of the significance of limitations and missing information with respect to our findings has been conducted, and where appropriate, significant data gaps are identified and discussed

Phase I Environmental Site Assessment

Proposed Burger King – Sewell, NJ ■ Sewell (Washington Township), NJ
January 27, 2022 ■ Terracon Project No. J6217094

in the text of the report. However, it should be recognized that an evaluation of significant data gaps is based on the information available at the time of report issuance, and an evaluation of information received after the report issuance date may result in an alteration of our conclusions, recommendations, or opinions. We have no obligation to provide information obtained or discovered by us after the issuance date of the report, or to perform any additional services, regardless of whether the information would affect any conclusions, recommendations, or opinions in the report. This disclaimer specifically applies to any information that has not been provided by the client.

This report represents our service to you as of the report date and constitutes our final document; its text may not be altered after final issuance. Findings in this report are based upon the site's current utilization, information derived from the most recent reconnaissance and from other activities described herein; such information is subject to change. Certain indicators of the presence of hazardous substances or petroleum products may have been latent, inaccessible, unobservable, or not present during the most recent reconnaissance and may subsequently become observable (such as after site renovation or development). Further, these services are not to be construed as legal interpretation or advice.

1.5 Reliance

This ESA report is prepared for the exclusive use and reliance of Ampler Development LLC, AB III LLC, Union Bank & Trust Company, and any parent company, affiliates, successors and assignees (collectively, the "Relying Parties"). Use or reliance by any other party is prohibited without the written authorization of the above-listed entities and Terracon Consultants, Inc. (Terracon).

Reliance on the ESA by the client and all authorized parties will be subject to the terms, conditions and limitations stated in the proposal, ESA report, and Terracon's Agreement for Services. The limitation of liability defined in the Agreement for Services is the aggregate limit of Terracon's liability to the client and all relying parties.

Continued viability of this report is subject to ASTM E1527-13 Sections 4.6 and 4.8. If the ESA will be used by a different user (third party) than the user for whom the ESA was originally prepared, the third party must also satisfy the user's responsibilities in Section 6 of ASTM E1527-13.

1.6 Client Provided Information

Prior to the site visit, Ms. Hannah Damon, client's representative, was asked to provide the following user questionnaire information as described in ASTM E1527-13 Section 6.

Client Questionnaire Responses

Client Questionnaire Item	Client Did Not Respond	Client's Response	
		Yes	No
Specialized Knowledge or Experience that is material to a REC in connection with the site.			X
Actual Knowledge of Environmental Liens or Activity Use Limitations (AULs) that may encumber the site.			X
Actual Knowledge of a Lower Purchase Price because contamination is known or believed to be present at the site.			X
Commonly Known or Reasonably Ascertainable Information that is material to a REC in connection with the site.			X
Obvious Indicators of Contamination at the site.			X

Terracon’s consideration of the client provided information did not identify RECs. Ms. Damon noted that a request for environmental liens and/or AULs has been submitted; however, the documents have not been received by the issuance of this report. A copy of the questionnaire is included in Appendix C.

2.0 PHYSICAL SETTING

Physical Setting Information		Source
Topography		
Site Elevation	Approximately 116 feet above sea level	USGS Topographic Map, Runnemede Quadrangle, 2019 (Appendix A)
Topographic Gradient	Sloping towards the north	
Closest Surface Water	Bulls Run, approximately 0.5 miles northeast of the site.	
Soil Characteristics		
Soil Type	UdauB —Udorthents-Urban land complex, 0 to 8 percent slopes AvtB —Aura-Sassafras sandy loams, 2 to 5 percent slopes SabC —Sassafras loamy sand, 5 to 10 percent slopes	Gloucester County, NJ USDA-NRCS Web Soil Survey issued August 31, 2021
Description	UdauB — well drained soils consisting of fill and/or disturbed original material AvtB — well-drained soils consisting of old loamy alluvium and/or old gravelly alluvium	

Physical Setting Information		Source
	SabC — well drained soils consisting of loamy and/or gravelly fluviomarine deposits	
Geology/Hydrogeology		
Formation	Lower Member of the Kirkwood Formation (lower Miocene, Aquitanian)	USGS New Jersey Bedrock Geology Source: Dalton, R.F., Herman, G.C., Monteverde, D.H., Pristas, R.S., Sugarman, P.J., and Volkert, R.A., 1999, New Jersey Department of Environmental Protection, Bedrock Geology and Topographic Base Maps of New Jersey
Description	This formation consists of sand typically fine- to medium-grained, massive to thick-bedded, locally crossbedded, and clay and clay-silt.	
Estimated Depth to First Occurrence of Groundwater	Approximately 16-20 feet below ground surface (bgs).	USGS Groundwater Data for Gloucester County, New Jersey
*Hydrogeologic Gradient	Not known - may be inferred to be parallel to topographic gradient (primarily to the north).	

* The groundwater flow direction and the depth to shallow, unconfined groundwater, if present, would likely vary depending upon seasonal variations in rainfall and other hydrogeological features. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained.

3.0 HISTORICAL USE INFORMATION

Terracon reviewed the following historical sources to develop a history of the previous uses of the site and surrounding area, in order to help identify RECs associated with past uses. Copies of selected historical documents are included in Appendix C.

3.1 Historical Topographic Maps, Aerial Photographs, Sanborn Maps

Readily available historical USGS topographic maps, selected historical aerial photographs (at approximately 10 to 15-year intervals) and historical fire insurance maps produced by the Sanborn Map Company were reviewed to evaluate land development and obtain information concerning the history of development on and near the site. Reviewed historical topographic maps and aerial photographs are summarized below.

Historical fire insurance maps produced by the Sanborn Map Company were requested from EDR to evaluate past uses and relevant characteristics of the site and surrounding properties. Based upon inquiries to the above-listed Sanborn provider, Sanborn maps were not available for the site.

- Topographic maps: Philadelphia, published in **1891, 1894, 1896, 1898, 1906, 1920** (1:62,500) and in **1943** (1:50,000); Camden, published in **1901** (1:125,000); Runnemede, published in **1952, 1981** (1:24,000); Runnemede and Woodbury, published in **1967, 1994, 1995, 2014, 2016, 2019** (1:24,000).

- Aerial photographs: 1931, 1940, 1944, 1951, 1959, 1962, 1965, 1971, 1974m 1981, 1992, 1995, 2006, 2010, 2013, 2017 (1" = 500').

Historical Maps and Aerial Photographs

Direction	Description
Site	<p>1891 – 1920: Structures are not depicted on the site.</p> <p>1931 – 1959: The site appears to consist of undeveloped agricultural land.</p> <p>1962 – 1995: Excavation activities are visible on the site and are presumably associated with mining and/gravel pit operations to the northeast/east of the site. Structures are not visible on the site. However, by 1965, the site appears to have been backfilled. Vegetation is not visible on the site. By 1995, vegetation appears to have grown sporadically throughout the site. Two dirt paths are also visible on the northern portion of the site and appear to be associated with other dirt roads on the remainder of the parent parcel.</p> <p>2006 – 2017: The site appears to contain two large piles, assumed to be soil and/or stone. Decorative trees appear to line the southwestern boundary. Significant changes were not evident through 2017.</p>
Northwest	<p>1891 – 1920: Structures are not depicted on the northwestern adjoining properties.</p> <p>1931: The northwestern adjoining properties appear to consist of undeveloped agricultural land.</p> <p>1940 – 1959: The northwestern adjoining properties appear to consist of undeveloped agricultural land and residential development.</p> <p>1962 – 1995: The land immediately to the northwest of the site appears to consist of a shallow pit presumably associated with mining and/gravel pit operations to the northeast/east of the site. By 1965, this area appears to have been backfilled and appears to consist of unpaved land. Additionally, a road is visible between the northwestern parent parcel boundary and the adjoining vacant grassy area. By 1971, the current-day residence is visible to the north-northwest of the site, across the parent parcel. . By 1995, vegetation appears to have grown sporadically throughout the northwestern portion of the parent parcel.</p> <p>2006 – 2017: The northwestern portion of the parent parcel appears to consist of soils and/or stone materials. Significant changes are not evident through 2017.</p>
East	<p>1891: Structures are not depicted on eastern adjoining property, which consists of the eastern portion of the parent parcel.</p> <p>1892 – 1931: An indiscernible structure is depicted on the eastern adjoining property.</p> <p>1940 – 1995: The eastern adjoining property appears to consist of agricultural land and an apparent farmstead consisting of residences and/or farm structures. By 1960, a portion of the parent parcel appears to consist of mining and/or gravel pit operations to the northeast/east of the site. By 1965, this area appears to have been backfilled to elevation of the surrounding streets. By 1995, vegetation appears to have grown sporadically throughout this area.</p> <p>2006 – 2017: The eastern adjoining property appears to consist of the current-day landscaping supplier occupant and wooded land. Significant changes were not evident through 2017.</p>

Direction	Description
Southwest	<p>1891 – 1920: Structures are not depicted to the southwestern properties, across Egg Harbor Road.</p> <p>1931 – 1971: The southwestern adjoining properties appear to consist of undeveloped agricultural land and apparent residences.</p> <p>1974 – 1992: The apparent residences are no longer visible to the southwest of the site. The current-day gas station is visible across Egg Harbor Road. The remainder of the properties consist of graded land.</p> <p>1995 – 2017: The current day commercial building and associated paved parking is visible to the southwest of the site. Significant changes are not evident through 2017.</p>

The site consisted of agricultural land from as at least 1931 to approximately the early 1960s. It should be noted that based on the agricultural usage of the site, pesticides and herbicides may have been used historically. A review of the historical site information did not indicate the storage of chemicals or petroleum, and no indication of a release on the site was identified. Therefore, the historical agricultural activities at the site is not considered a REC at this time.

Additionally, evidence of excavation activities was observed at the site during the early 1960s and appears to be associated with the sand pit to the northeast of the site. By 1965, these activities appeared to have ceased and the surrounding area appears to have been backfilled. Terracon notes that site underwent extensive excavation activities sometime in 2019 during the development of Blackwood Barnsboro Road. Additionally, Terracon observed the approximate location of the historic excavation activities and did not observe evidence of disturbed soils in the area during the site reconnaissance. As such, the excavation and backfilling activities during the 1960s do not constitute a REC for the site. Please refer to Section 5.0 for additional details.

Lastly, based on the distance and gradient of established the Classification Exception Area (CEA) associated with the southwestern adjoining gas station, the adjoining gas station does not constitute a REC.

3.2 Historical City Directories

The EDR Digital Archive and March Publishing Company city directories used in this study were made available through EDR (selected years reviewed: 1973-2017) and were reviewed at approximate five-year intervals, if readily available. Street listings not available prior to [Year]. The current street address for the site was identified as 108 Egg Harbor Road; however, the address for the parent parcel was also identified as 212 Blackwood Barnsboro Road.

Historical City Directories

Direction	Description
Site / Parent Parcel to the northwest and east)	108 Egg Harbor Road – No listings available (1973-2017). 212 Blackwood Barnsboro Road – No listings available (1973-1995); Five Points Landscape Products (2000); County Conservation Company (2005-2010); No listings available (2014-2017).
Northwest	209 Blackwood Barnsboro Road – No listings available (1973-2017).
Southwest	107 Egg Harbor Road – No listings available (1973-2000); Wawa (2005-2014); Xpress Mart (2017). 108 Delsea Drive – No listings available (1973-2017).

Based on the distance and gradient of the established CEA associated with the southwestern adjoining gas station, the adjoining gas station does not constitute a REC.

3.3 Site Ownership

Based on a review of information obtained from the Gloucester County assessor’s records, the current site owner is JPC Group Real Estate LLC.

3.4 Title Search

At the direction of the client, a title search was not included as part of the scope of services. Unless notified otherwise, we assume that the client is evaluating this information outside the scope of this report.

3.5 Environmental Liens and Activity and Use Limitations

At the direction of the client, performance of a review of environmental liens and activity and use limitations was included as part of the scope of services for which Terracon engaged Texas Environmental of Rockwall, Texas. Based on a review of the title provider’s research, environmental liens or activity and use limitations were not identified. In addition, the EDR regulatory database report included a review of both Federal and State Engineering Control (EC) and Institutional Control (IC) databases. Based on a review of the database report, the site was not listed on the EC or IC databases.

3.6 Interviews Regarding Current and Historical Site Uses

The following individuals were interviewed regarding the current and historical use of the site.

Interviews

Interviewer	Name / Phone #	Title	Date/Time
Lizett Jimenez	Greg Tancredi / (856) 227-6900	Manager at County Conservation Company	January 18, 2022

Terracon interviewed Mr. Greg Tancredi, manager at County Conservation Company, the owner and occupant of the parent parcel, during the site reconnaissance. According to Mr. Tancredi, County Conservation Company began utilizing the site/parent parcel in 1991. County Conservation Company utilized the site to store soils and stone through 2018. Around the end of 2020, County Conservation Company constructed Blackwood Barnsboro Road to the east of the site. Mr. Tancredi noted that the site has not been utilized by County Conservation Company after the development of Blackwood Barnsboro. Mr. Tancredi was not aware of the groundwater monitoring wells observed on the western portion of the parent parcel. Please see Section 5.0 for additional details regarding the observed groundwater monitoring well.

Mr. Tancredi was not aware of any pending, threatened or past environmental litigation, proceedings or notices of possible violations of environmental laws or liability in connection with the site.

3.7 Prior Report Review

Terracon requested the client provide any previous environmental or geotechnical reports they are aware of for the site. Previous reports were not provided by the client to Terracon for review.

4.0 RECORDS REVIEW

Regulatory database information was provided by EDR, a contract information services company. The purpose of the records review was to identify RECs in connection with the site. Information in this section is subject to the accuracy of the data provided by the information services company and the date at which the information is updated. The scope herein did not include confirmation of facilities listed as "unmappable" by regulatory databases.

In some of the following subsections, the words up-gradient, cross-gradient and down-gradient refer to the topographic gradient in relation to the site. As stated previously, the groundwater flow direction and the depth to shallow groundwater, if present, would likely vary depending upon seasonal variations in rainfall and the depth to the soil/bedrock interface. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained.

4.1 Federal and State/Tribal Databases

Listed below are the facility listings identified on federal and state/tribal databases within the ASTM-required search distances from the approximate site boundaries. Database definition, descriptions, and the database search report are included in Appendix D.

Federal Databases

Database	Description	Distance (miles)	Listings
CERCLIS	Comprehensive Environmental Response, Compensation, & Liability Information System	0.5	0
CERCLIS / NFRAP	Comprehensive Environmental Response, Compensation, & Liability Information System/No Further Remedial Action Planned	0.5	0
ERNS	Emergency Response Notification System	Site	0

Phase I Environmental Site Assessment

Proposed Burger King – Sewell, NJ ■ Sewell (Washington Township), NJ
 January 27, 2022 ■ Terracon Project No. J6217094

In addition to the above ASTM-required listings, Terracon reviewed other federal, state, local, and proprietary databases provided by the database firm. A list of the additional reviewed databases is included in the regulatory database report included in Appendix D.

The following table summarizes the site-specific information provided by the database and/or gathered by this office for identified facilities within 500 feet of the site. Facilities are listed in order of proximity to the site and distances have been adjusted where applicable. Additional discussion for selected facilities follows the summary table.

Listed Facilities

Facility Name and Location	Estimated Distance / Direction/Gradient	Database Listings	Is a REC, CREC, or HREC to the Site
Wawa - Egg Harbor Rd 108 Egg Harbor Road	Site / Parent Parcel	ECHO, NJEMS, NPDES	No, see discussion below
Mullary's Texaco / Five Points Gas Station 108 Delsea Drive	Adjoining, approximately 100 feet / southwest / crossgradient	HIST LUST, SPILLS, LUST, SHWS, SPILLS, UST	No, see discussion below
116 Delsea Drive 116 Delsea Dr	Approximately 230 feet / southwest / crossgradient	NJ Release, VCP	No, based on regulatory status, distance, and gradient
Former Service Station 124 N Delsea Dr	Approximately 300 feet / southwest / crossgradient	HIST LUST	No, based on regulatory status, distance and gradient
Former Bp S/Sc#00922 / Maa Sherwali Llc (Gas Stop) Rt 41 & Egg Harbor Rd (Rt 47)	Approximately 360 feet / west / crossgradient	HIST LUST, AIRS, NJEMS, SHWS	No, based on distance and gradient
Ed Lawrenson Inc Rt 41 North	Approximately 410 feet / northwest / crossgradient	HIST LUST	No, based on distance and gradient
Five Points Spotless Cleaners Rt 41 & 47	Approximately 490 feet north-northwest / downgradient	AIRS, DRYCLEANERS	No, based on regulatory status, distance and gradient

Wawa (Site / 108 Egg Harbor Road)

The site address is listed in the ECHO, NJEMS, and NPDES databases. The site is listed in the NJEMS database as part of the Lower Delaware Watershed Management Area. According to the EDR and ECHO databases, the site is also listed in the New Jersey Pollutant Discharge Elimination System (NJPDES) for a Construction Activity Stormwater General Permit. The permit was issued in September 2020 and has an expiration date of February 2022. Additional details

Phase I Environmental Site Assessment

Proposed Burger King – Sewell, NJ ■ Sewell (Washington Township), NJ
January 27, 2022 ■ Terracon Project No. J6217094

were not provided. Based on a conversation with Mr. Tuncredi, manager at the parent parcel, Blackwood Barnesboro Road was developed on the parent parcel circa 2000. Based on the limited information, Terracon presumes the general permit pertains to the development of Blackwood Barnesboro Road. As such, the identified listings do not constitute a REC for the site.

Terracon also searched the NJDEP DataMiner database for well permits. NJDEP DataMiner identified two groundwater monitoring wells installed at the western portion of the parent parcel. MW-2 was installed on November 19, 2018 by JPC GROUP REAL ESTATE LLC, the current parent parcel owner, to a total depth of 40 feet below ground surface. Please note, MW-2 appears to be located a few feet from the northern site boundary and was presumably observed during the site reconnaissance. MW-3 was installed on November 20, 2018 by the parcel owner to a total depth of 40 feet below ground surface. Please note, this monitoring well was observed approximately 150 feet north-northwest of the site during the site reconnaissance. Additional information regarding the onsite monitoring wells were not provided. Based on the lack of recorded releases at the site/parent parcel, the monitoring wells do not constitute a REC for the site at this time. However, based on additional research of the surrounding area, the monitoring wells may be associated with an active groundwater contamination investigation occurring at the southwestern adjoining property. Please see Mullary's Texaco / Five Points Gas Station below for more details. At this time, the lack of groundwater data collected from the monitoring wells constitutes a significant data gap at this time.

Mullary's Texaco / Five Points Gas Station (108 Delsea Drive, adjoining, crossgradient)

This southwestern adjoining property is located approximately 100 feet southwest of the site and is listed in the HIST LUST, SPILLS, LUST, SHWS, SPILLS, and UST databases. The listings are associated with Case Incident 01-12-06-1331-44 and Preferred Identification Number (PID) 001239. According to the information obtained from the EDR and NJDEP DataMiner databases, the PID 001239 pertains to groundwater investigations that commenced in 2001. Groundwater contamination was confirmed under the regulated UST program. A light non-aqueous phase liquid (LNAPL) was confirmed at the facility in 2017. The facility is under a Licensed Site Remediation Professional's (LSRP) oversight. Please note, this groundwater contamination case appears to be active. A delineated a Classification Exception Area (CEA) for the groundwater contamination was not identified under PID 001239.

As aforementioned, two groundwater monitoring wells were identified on the parent parcel. Based on the date of installation (2018) relative to the date of the LNAPL investigation (2017), it seems plausible that the monitoring wells were installed at the parent parcel as part of the groundwater investigations at this property. Terracon was not provided with groundwater data collected at the monitoring wells by the issuance of this report. At this time, the lack of data constitutes a significant data gap.

This facility is also listed under PID 003634. Under PID 003634, the facility delineated a CEA for groundwater contamination. According to the CEA Fact Sheet, the CEA is not mapped at the property (Block 8.01, Lots 3.01 and 4). Instead, the CEA is mapped on a property to the northwest of the facility and extends to other properties to the northwest. Contaminants of concern include

Phase I Environmental Site Assessment

Proposed Burger King – Sewell, NJ ■ Sewell (Washington Township), NJ
January 27, 2022 ■ Terracon Project No. J6217094

benzene, naphthalene, tert-butyl-alcohol, and total xylene. Please note, the CEA is mapped approximately 385 feet from the site and 400 feet from the parent parcel. Based on the regulatory status of the CEA and considering the distance and gradient, the CEA does not constitute a REC for the site.

The remaining facilities listed in the database report do not appear to represent RECs to the site at this time based upon regulatory status, apparent topographic gradient, and/or distance from the site.

Unmapped facilities are those that do not contain sufficient address or location information to evaluate the facility listing locations relative to the site. The report listed 24 facilities in the unmapped section. Determining the location of unmapped facilities is beyond the scope of this assessment; however, none of these facilities were identified as the site or adjacent properties. These facilities are listed in the database report in Appendix D.

4.2 Local Agency Inquiries

Agency Contacted/ Contact Method	Response
NJDEP / By online submission	At the issuance of this report, a response from the NJDEP has not been provided.
Gloucester County By email	At the issuance of this report, a response from Gloucester County has not been provided. However, Terracon reviewed online county records.
Washington Township By email	At the issuance of this report, a response from Pilesgrove Township has not been provided.

Terracon also reviewed the NJDEP DataMiner, NJ GEOWEB, and EPA Enforcement and Compliance History Online (ECHO) databases for information pertaining to the Site and adjoining properties. According to the NJ GeoWeb online database, the Site is not located in a quadrangle mapped for historic fill. Additional pertinent information regarding the Site or adjoining properties are detailed in Section 4.1 of the report

According to the NJ GeoWeb database, the site is not mapped as historic fill. According to the geography data recorded on the obtained well permits, the parent parcel soils in the vicinity of the site consist of light brown to brown silty sands.

5.0 SITE RECONNAISSANCE

5.1 General Site Information

Information contained in this section is based on a visual reconnaissance conducted while walking through the site and the accessible interior areas of structures, if any, located on the site. The site

Phase I Environmental Site Assessment

Proposed Burger King – Sewell, NJ ■ Sewell (Washington Township), NJ
January 27, 2022 ■ Terracon Project No. J6217094

and adjoining properties are depicted on the Site Diagram, which is included in Exhibit 2 of Appendix A. Photo documentation of the site at the time of the visual reconnaissance is provided in Appendix B. Credentials of the individuals planning and conducting the site visit are included in Appendix E.

General Site Information

Site Reconnaissance	
Field Personnel	Lizett Jimenez
Reconnaissance Date	January 18, 2022
Weather Conditions	Cloudy, approximately 30 degrees Fahrenheit
Site Contact/Title	Simone Boyle / The Ferber Company

5.2 Overview of Current Site Occupants

The site consists of an approximate 1.5-acre portion of a larger approximate 8.2-acre parent parcel located at 108 Egg Harbor Road in Sewell (Washington Township), Gloucester County, New Jersey. Specifically, per the client's request, the site encompasses the southwestern portion of the parent parcel, which was identified as the location of the proposed Burger King and associated parking lot. The site currently consists of a vacant, unpaved area. According to County records, historical aerial photographs, and an interview with the manager at County Conservation Company (the owner and occupant of the remainder of the parent parcel), the site has not been utilized by County Conservation Company since approximately 2020.

5.3 Overview of Current Site Operations

The site has not been utilized by County Conservation Company since approximately 2020. As such, current site operations were not observed at the time of the site recon

5.4 Site Observations

The following table summarizes site observations and interviews. Affirmative responses (designated by an "X") are discussed in more detail following the table.

Site Characteristics

Category	Item or Feature	Observed or Identified
Site Operations, Processes, and Equipment	Emergency generators	
	Elevators	
	Air compressors	
	Hydraulic lifts	

Phase I Environmental Site Assessment

Proposed Burger King – Sewell, NJ ■ Sewell (Washington Township), NJ
 January 27, 2022 ■ Terracon Project No. J6217094

Category	Item or Feature	Observed or Identified
	Dry cleaning	
	Photo processing	
	Ventilation hoods and/or incinerators	
	Waste treatment systems and/or water treatment systems	X
	Heating and/or cooling systems	
	Paint booths	
	Sub-grade mechanic pits	
	Wash-down areas or carwashes	
	Pesticide/herbicide production or storage	
	Printing operations	
	Metal finishing (e.g., electroplating, chrome plating, galvanizing, etc.)	
	Salvage operations	
	Oil, gas or mineral production	
	Other processes or equipment	
Aboveground Chemical or Waste Storage	Aboveground storage tanks	
	Drums, barrels and/or containers ≥ 5 gallons	
	MSDS or SDS	
Underground Chemical or Waste Storage, Drainage or Collection Systems	Underground storage tanks or ancillary UST equipment	
	Sumps, cisterns, French drains, catch basins and/or dry wells	
	Grease traps	
	Septic tanks and/or leach fields	
	Oil/water separators, clarifiers, sand traps, triple traps, interceptors	
	Pipeline markers	
	Interior floor drains	
Electrical Transformers/PCBs	Transformers and/or capacitors	
	Other equipment	

Phase I Environmental Site Assessment

Proposed Burger King – Sewell, NJ ■ Sewell (Washington Township), NJ
 January 27, 2022 ■ Terracon Project No. J6217094

Category	Item or Feature	Observed or Identified
Releases or Potential Releases	Stressed vegetation	
	Stained soil	
	Stained pavement or similar surface	
	Leachate and/or waste seeps	
	Trash, debris and/or other waste materials	
	Dumping or disposal areas	
	Construction/demolition debris and/or dumped fill dirt	
	Surface water discoloration, odor, sheen, and/or free floating product	
	Strong, pungent or noxious odors	
	Exterior pipe discharges and/or other effluent discharges	
Other Notable Site Features	Surface water bodies	
	Quarries or pits	X
	Wastewater lagoons	
	Wells	X

Site Operations, Processes, and Equipment

Other process or equipment

A sanitary sewer manhole was observed in the southwestern corner of the site. Releases and/or evidence of a release was not observed in the vicinity of the manhole. The sanitary sewer manhole does not constitute a REC for the site.

Other Notable Site Features

Wells

One groundwater monitoring well (presumed to be MW-3) was observed approximately 150 feet northwest of the site and within the parent parcel. The well head was observed approximately 1.5 feet above the ground surface with the concrete pad and flush-mounted manhole still intact. An additional apparent stick-up groundwater monitoring well (presumed to be MW-2) was observed a few feet from the northern site boundary, on the parent parcel. According to the monitoring well permits provided by NJDEP DataMiner, the wells were installed in November 2018. Based on additional research of the surrounding area, the monitoring wells may be associated with an active groundwater contamination investigation occurring at the southwestern adjoining property. Please see Section 5.0 for more details. At this time, the lack of groundwater data collected from the monitoring wells constitutes a significant data gap.

Quarries or pits

Please note, based on a review of the historical information, evidence of excavation activities was observed at the site during the early 1960s and appeared to be associated with a sand pit to the northeast of the site. By 1965, these activities appeared to have ceased and the surrounding area appeared to be backfilled. Additionally, as aforementioned, a groundwater monitoring well head was observed approximately 1.5 feet above the ground surface with the concrete pad and flush-mounted manhole still intact. As such, Terracon believes the site was at a higher elevation at the time the flush-mounted monitoring well was installed in 2018. The site and immediate area were then excavated sometime between 2018 and the 2022 site visit, leaving the monitoring well concrete pad standing approximately 1.5 feet above the ground surface. Terracon presumes that the excavation activities occurred during the development of Blackwood Barnsboro Road in 2019. Terracon observed the approximate location of the historic excavation activities and did not observe evidence of disturbed soils in the area during the site reconnaissance. Based on the extensive excavation activities and considering no evidence of distinctively disturbed soils was observed at the site, the excavation and backfilling activities during the 1960s do not constitute a REC for the site.

6.0 ADJOINING PROPERTY RECONNAISSANCE

Visual observations of adjoining properties (from site boundaries) are summarized below.

Adjoining Properties

Direction	Description
Northwest	Parent parcel and a vacant grassy area followed by a residence (209 Blackwood Barnsboro Road)
East	Blackwood Barnsboro Road followed by the parent parcel occupied by County Conservation Company
Southwest	Egg Harbor Road followed by an Xpressmart (107 Egg Harbor Road) and Exxon Gas Station (108 Delsea Drive)

RECs were not observed with the adjoining properties.

Phase I Environmental Site Assessment

January 27, 2022 ■ Terracon Project No. J6217094

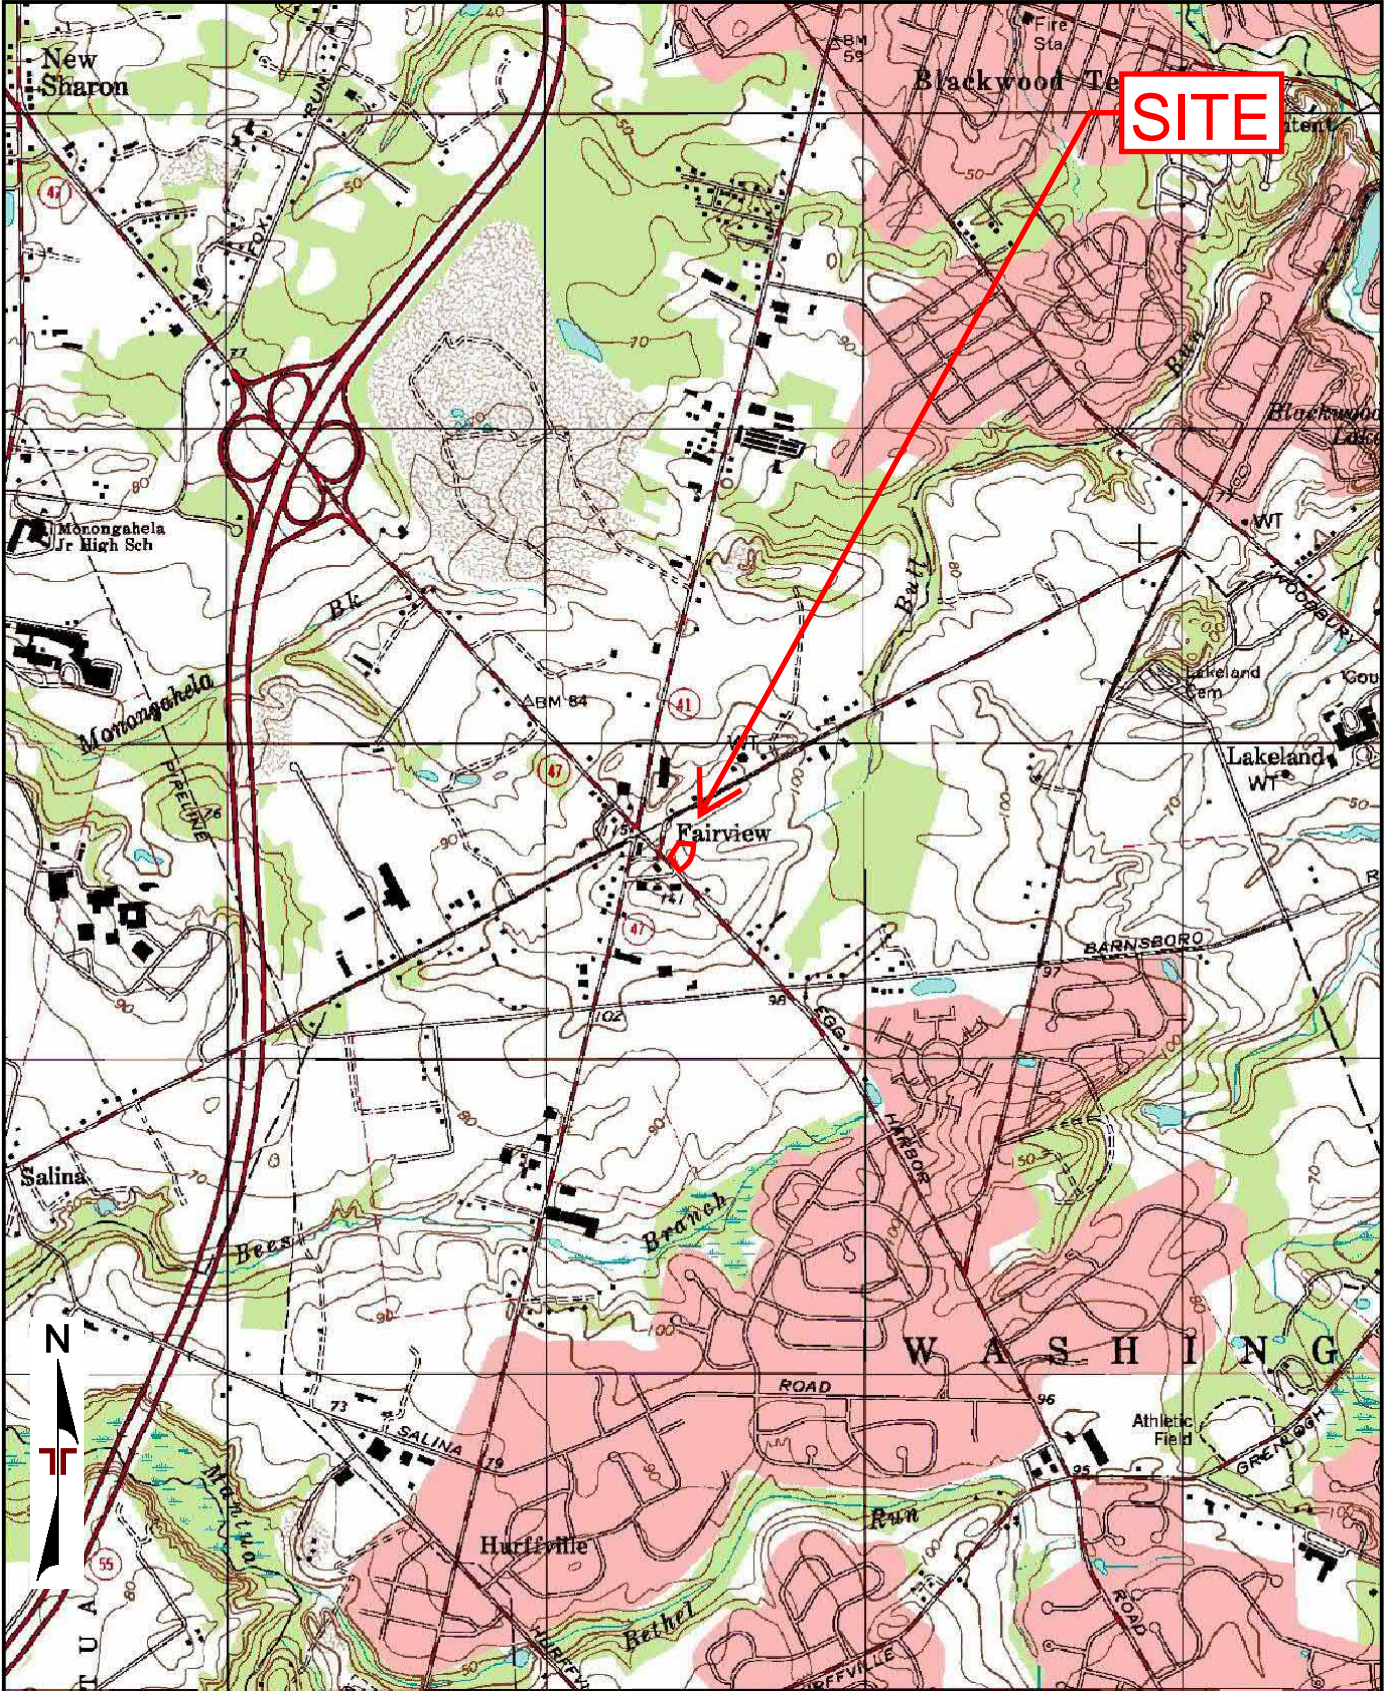

7.0 DECLARATION

I, Chris C. Langewisch, declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312; and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the site. I have developed and performed the All Appropriate Inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

FOR : Chris C. Langewisch
Senior Scientist

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Terracon were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Contact: Lizett Jimenez

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Search Results:

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Client/User Required Questionnaire

Person Completing Questionnaire	Name: <u>Hannan Damron</u> Company: <u>Ampler development LLC</u> Proposed Burger King, Sewell	Phone: <u>512 939 5103</u> Email: <u>HDamron@amplergrp.com</u>
Site Name	Proposed Burger King, Sewell	
Site Address	108 Egg Harbor Road Sewell, NJ	
Point of Contact for Access	Name: <u>Samone Boyle</u> Company: <u>The Ferber Company</u>	Phone: <u>501-025-9125</u> Email: <u>SBoyle@ferbercompany.com</u>
Access Restrictions or Special Site Requirements?	<input type="checkbox"/> No <input checked="" type="checkbox"/> Yes (If yes, please explain) <u>See Dec 13, 2021, Email from Attorney</u>	
Confidentiality Requirements?	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes (If yes, please explain)	
Current Site Owner	Name: Company: <u>2019 Blackwood Washington LLC MA</u>	Phone: Email: <u>MA</u>
Current Site Operator	Name: Company: <u>MA</u>	Phone: Email: <u>NA</u>
Reasons for ESA (e.g., financing, acquisition, lease, etc.)	<u>Acquisition</u>	
Anticipated Future Site Use	<u>Proposed Burger King</u>	
Relevant Documents?	Please provide Terracon copies of prior Phase I or II ESAs, Asbestos Surveys, Environmental Permits or Audit documents, Underground Storage Tank documents, Geotechnical Investigations, Site Surveys, Diagrams or Maps, or other relevant reports or documents.	
ASTM User Questionnaire		
In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the user must respond to the following questions. Failure to provide this information to the environmental professional may result in significant data gaps, which may limit our ability to identify recognized environmental conditions resulting in a determination that "all appropriate inquiry" is not complete. This form represents a type of interview and as such, the user has an obligation to answer all questions in good faith, to the extent of their actual knowledge.		
1) Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state, or local law (40 CFR 312.25)? <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes (If yes, explain below and send Terracon a copy of the title records or judicial records reviewed.)		
2) Did a search of recorded land title records (or judicial records where appropriate) identify any activity and use limitations (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state, or local law (40 CFR 312.26)? <u>Has not been reviewed</u> <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes (If yes, explain below and send Terracon a copy of the title records or judicial records reviewed.)		
3) Do you have any specialized knowledge or experience related to the site or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the site or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business (40 CFR 312-28)? <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes (If yes, explain below)		
4) Do you have actual knowledge of a lower purchase price because contamination is known or believed to be present at the site (40 CFR 312.29)? <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> Not applicable (If yes or Not applicable, explain below)		
5) Are you aware of commonly known or reasonably ascertainable information about the site that would help the environmental professional to identify conditions indicative of releases or threatened releases (40 CFR 312.30)? <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes (If yes, explain below)		
6) Based on your knowledge and experience related to the site, are there any obvious indicators that point to the presence or likely presence of contamination at the site (40 CFR 312.31)? <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes (If yes, explain below)		
Comments or explanations:		

Please return this form with the signed authorization to proceed.

108 EGG HARBOR ROAD
SEWELL, NJ 08080

TARGET PROPERTY COORDINATES

Latitude (North):	39.783152 - 39° 46' 59.35"
Longitude (West):	75.099621 - 75° 5' 58.64"
Universal Transverse Mercator:	Zone 18
UTM X (Meters):	491469.3
UTM Y (Meters):	4403485.0
State Plane X (Feet):	323619.5
State Plane Y (Feet):	346494.1
Elevation:	116 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	14317893 RUNNEMEDE, NJ
Version Date:	2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
RUNNEMEDE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	0 - 1/8 Mile West
Site Name:	Blackwood-Barnsboro Road Property
Site EPA ID Number:	NJ0001118892
Groundwater Flow Direction:	Southwest
Inferred Depth to Water:	100 feet.
Hydraulic Connection:	Confining layers are present between the surficial aquifer and lower aquifers.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Tertiary
Series:	Paleocene
Code:	Tx (<i>decoded above as Era, System & Series</i>)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Udorthents

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 1.4	Max: 5.5 Min: 5.1
2	11 inches	72 inches	loamy sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 1.4	Max: 5.5 Min: 5.1

Soil Map ID: 2

Soil Component Name: Aura

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 305 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

2	20 inches	27 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42.34 Min: 14.11	Max: 5.5 Min: 4.3
3	46 inches	79 inches	stratified sandy loam to sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42.34 Min: 14.11	Max: 5.5 Min: 4.3
4	27 inches	46 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42.34 Min: 14.11	Max: 5.5 Min: 4.3
5	0 inches	9 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42.34 Min: 14.11	Max: 5.5 Min: 4.3

Soil Map ID: 11

Soil Component Name: Buddtown

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 30 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14.11 Min: 4.23	Max: 5.5 Min: 3.5
2	53 inches	64 inches	coarse sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14.11 Min: 4.23	Max: 5.5 Min: 3.5
3	33 inches	40 inches	loamy coarse sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14.11 Min: 4.23	Max: 5.5 Min: 3.5
4	11 inches	25 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14.11 Min: 4.23	Max: 5.5 Min: 3.5

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

**APPENDIX E
CREDENTIALS**

Christopher J. Candela

**Senior Associate / Department Manager, Environmental Services
Philadelphia Metro / New Jersey North / Albany, NY Offices**

PROFESSIONAL EXPERIENCE

Christopher Candela has over 30 years of experience in the environmental field, during which time he has completed numerous domestic and international environmental compliance audits of refrigeration manufacturing facilities, auto manufacturing facilities, plasma coating facilities, dairy facilities, packaging manufacturers, and refineries. Additionally, Mr. Candela has had direct oversight of multiple site programs for major petroleum clients. He has served as Safety Auditor, ensuring that all employees adhered to client SOPs, reviewed work scopes and audited project sites for compliance with client Health and Safety Policies.

Prior to joining Terracon, Mr. Candela managed the Environmental, Health & Safety Division for the Philadelphia Regional Area at ATC. He provided project management, budget tracking, scheduling and coordination for environmental investigations which include: environmental compliance audits, site investigations; site assessments (Phase I and II); property divestment assessments; underground storage tank (UST) closures; remediation system design and installation; hydrogeologic studies; data acquisition and interpretation. Mr. Candela was also responsible for branch Health and Safety program development and implementation, risk reduction, loss control, OSHA training, and compliance with federal and state regulations.

PROJECT EXPERIENCE

Compliance Assessments / Multiple Private, State, and Federal Clients / NY, NJ, CT, PA, DE, MD, VA, DC, 1989 – present

Provide oversight and coordination of environmental, Health & Safety (EHS) compliance audits, to evaluate facilities with respect to local, State and Federal regulations. Provide oversight and coordination for the development of Spill Prevention, Control and Countermeasure (SPCC) Plans and Stormwater Pollution Prevention Plan (SWPPP), as well as National Pollutant Discharge Elimination System (NPDES) permitting. Provide EHS training to facilities.

Hazardous Materials Assessments / Multiple National and Local Clients / NY, NJ, CT, PA, DE, MD, VA, DC, 1989 – present

Provide oversight and coordination of hazardous materials assessments to identify and quantify potential hazardous materials including universal wastes, polychlorinated biphenyls (PCBs), chlorofluorocarbon (CFC)-containing items, asbestos, mold and lead based paint and others.

Compliance / Valero Port Arthur Refinery / Port Arthur, TX, 2007

Acted as Lead Auditor for an audit team that examined the effectiveness of the refinery's Environmental Management System (EMS) in accordance with the Texas Commission on Environmental Quality (TCEQ) requirements as specified in 30 TAC

PRESENTATIONS/PUBLISHED ARTICLES

NPDES Regulatory Overview, "Individual vs. Multi-Sector NPDES Permits", and Implementing Storm Water Pollution Prevention Plans" – York International Annual Environmental Health and Safety Conference, November 1998

"Regulatory Overview and Technical Issues Affecting Data Quality in Environmental Samples" – York International Annual Environmental Health and Safety Conference, January 1994

90 and associated guidance. All of the EMS elements were reviewed in the context of whether they were sufficient to produce continuing results and whether they were producing final results. In places where performance was lacking, the audit team will examine what was missing in the EMS that led to the failure in performance.

Compliance / York International / York, PA, 1991 - 2001

Conducted environmental compliance audits of existing domestic and international refrigeration manufacturing facilities. Coordinated the client's national hazardous and non-hazardous waste hauling contract. Developed corporate programs for Contingency Plans, Spill Plans, Pollution Prevention Plans, Waste Minimization Plans, Permit compliance and other regulatory issues. Assisted in developing and implementing H&S programs and policies including Reporting and Record Keeping, Respiratory Protection, Personal Protective Equipment (PPE), Hazard Communication, Confined Space Entry, Emergency Response Plans, Traffic Control, and others.

Compliance / Cincinnati Thermal Spray / Cincinnati, OH, 1994 - 2000

Conducted environmental compliance audits of existing plasma coating facilities in New Jersey, Ohio and North Carolina. Developed corporate programs for Contingency Plans, Spill Plans, Pollution Prevention Plans, Waste Minimization Plans, Permit compliance and other regulatory issues. Assisted in developing and implementing H&S programs and policies including Reporting and Record Keeping, Respiratory Protection, Personal Protective Equipment (PPE), and Hazard Communication.

Compliance / General Motors Corporation / Wilmington, DE, 1992 - 2001

Conducted bi-annual environmental compliance audits of Saturn assembly facility. Developed and implemented the facility's RCRA Contingency Plan, Stormwater Pollution Prevention Plan and Spill Prevention Plan.

Remediation and Redevelopment / SuperValu – Harrisburg, PA, 2018 – present

Re-Development of 115,000-square foot warehouse on the site of an environmental covenant placed for lead and antimony contamination. Developed, implemented and managed Health and Safety Plan with daily air monitoring and Soil Management Plan. \$360,000.

Remediation / Evergreen Estates – Lancaster, PA, 2017 - 2019

Completion of Site Characterization / Remedial Action Plan / Remedial Action Completion to Site Specific Standard and completion of Environmental Covenant to allow site regulatory closure under the Act 2 Program

Remediation / Tybouts Corner Superfund Site /New Castle, DE, 1995 – 2001

Served as QA/QC officer during implementation of Operations and Maintenance Phase for remediation program. Responsibilities included daily inspection for quality control of contractor practices, conformance to specifications and drawings and schedule and budget supervision. Maintained conformance and documented progress toward project goals for regulatory agencies. Management activities included supervising a staff of treatment plant operators, daily monitoring of plant effluent, ensuring the proper operation of numerous pumps, the use of data to determine the effectiveness of the control technology and the submission of required reports. Additional responsibilities at the cap included weekly inspections, oversight of repairs, collection of multi-media samples, and submission of required reports. Health and Safety Officer responsible for OSHA record keeping and employee health and safety training.

WORK HISTORY

Terracon Consultants, Inc.,
Environmental Department
Manager, 2017 - Present

ATC Group Services, LLC
Environmental, Health & Safety
Division Manager
2002 - 2017

Handex of Eastern Pennsylvania
Senior Project Manager
2001 - 2002

Clean Technologies
1989 - 2001

Remediation / Army Creek Superfund Site / New Castle, DE, 1993 – 2001

Assisted with construction management oversight services. Responsibilities included review of construction practices and conformance to specifications, as well as the tracking and maintenance of the schedule and costs. Acted as liaison between regulatory agencies and client. Managed daily operations and maintenance of facility and 32-acre capped site. Responsibilities for the treatment plant included managing a staff of treatment plant operators, daily monitoring of treatment plant effluent, ensuring the other hydraulic systems, calculation of proper lime and polymer feed rates and the submission of required monthly reports. Additional responsibilities at the cap included weekly inspections, oversight of repairs and submission of required reports. Health and Safety Officer responsible for OSHA record-keeping and employee health and safety training.

Site Investigation / Chrysler Corporation / Dayton, OH, 1993 – 1996

Served as Project QA/QC officer. Responsibilities included soil vapor survey oversight, groundwater monitoring well design and installations, groundwater and soil sampling, incorporation of data from surrounding properties and assessment of the site for DNAPL contamination.

Remediation / Chrysler Corporation / Twinsburg, Dayton and Toledo, OH and New Castle, IN, 1993 – 1997

Conducted studies to determine the effectiveness of remediating contaminated soils and/or groundwater utilizing bioremediation technology; installed bioreactors to remediate the impacted soils. Operated and maintained bioremediation systems. All sites achieved closure ahead of scheduled time line.

Remediation / Harvey & Knott Superfund Site – General Motors / Glasgow, DE, 1991 - 2001

Implemented and managed multi-media, semi-annual monitoring program. Evaluated the design of cap and provided construction management that included daily inspections for quality control of construction practices, conformance to specifications and certification of quantities of soils placed/displaced, as well as the tracking of the schedule and costs as the Owner's representative and liaison with regulatory agencies. Health and Safety Officer responsible for OSHA record keeping and employee health and safety training.

Remediation / York International / York, PA, 1991 – 2001

Served as project director for a site containing soils and groundwater impacted by PCE and TCE. Designed and managed construction, operation and maintenance of an air-stripping tower with carbon emission control for the treatment of groundwater and a vacuum extraction system for soil remediation with carbon emission control.

Storm Water Management / General Motors Corporation / Wilmington, DE, 1991 – 2001

Developed and managed a storm water sampling program to comply with the facility's NPDES permit and corporate requirements. Member of emergency response team. Responsibilities included emergency response actions in the event that a release of hazardous materials enters the storm water system.

Christopher C. Langewisch

SENIOR PROJECT MANAGER

PROFESSIONAL EXPERIENCE

Christopher Langewisch has over 30 years of experience in the environmental field, during which time he has been responsible for the development, performance and supervision of site and remedial investigations, developed and initiated procedures for field work, designed and implemented remedial action plans, site assessments, delineation surveys, extensive preliminary assessments, and extensive soil and groundwater sampling investigations. He has managed more than 500 projects including brownfields redevelopment, underground storage tank closures and remediation, Industrial Site Recovery Act (ISRA) compliance, as well as remediation and regulatory compliance under the Site Remediation Reform Act (SRRA). Additionally, Mr. Langewisch has provided expert witness testimony on environmental cases. With extensive experience in navigating the NYSDEC Site Cleanup and State Superfund Programs, NYSDEC DER-10 rules, NJDEP Site Remediation Reform Act (SRRA), Administrative Requirements for Remediation of Contaminated Sites (ARRCS), and the Technical Requirements for Site Remediation (Tech Rules).

Prior to joining Terracon, Mr. Langewisch was Senior Project Manager and new Jersey Licensed Site Remediation Professional (LSRP) for Equity Environmental Engineering. He provided project management, budget tracking, scheduling and coordination for environmental investigations which include: site investigations; site assessments (Phase I and II); underground storage tank (UST) closures; Site Investigation and remediation under both NJDEP, NYSDEC and NYC Office of Environmental Remediation rules, data acquisition and interpretation.

PROJECT EXPERIENCE

Investigation and Remediation / BICC Cables Site – Yonkers, NY 2009 - 2014

Project Manager overseeing the remediation of a 13-acre State-listed hazardous waste site, known as the former BICC Cables Site in Yonkers, New York, the location of a former a heavy cable manufacturing facility since the late 1800's. Contaminants of concern included PCBs, lead, and volatile organic compounds in building surfaces, subsurface soils and in river sediments. The site was extensively underlain with historic fill and PCB waste. Completed the characterization and remediation of the site, including oversight of the implementation and construction of a new remedial bulkhead to retain site sediments as required by NYSDEC. Prepared and submitted multiple delineation and remediation work plans for various phases of remediation at the site, which was approved by NYSDEC and USEPA. Oversaw a multi-phase remediation program that included dredging of sediment in the Hudson River, subsurface soil excavation, hot spot removal, building and concrete slab demolition, bulkhead restoration, and implementing engineering and institutional controls (deed notice and cap system). Activities included developing remediation plans and specifications, providing bidding assistance, provide on-site field oversight and supervision of contractors' remediation activities, and performing confirmatory sampling and providing for closure documentation, Final Engineering Reports and Site Management Plan.
Project Value - \$75,000,000.

EDUCATION

WORK HISTORY

Terracon Consultants, Inc.,
Environmental Department Manager,
2019 - Present

Equity Environmental Engineering
Senior Project Manager
2015 - 2019

H2M Associates
Senior Project Manager
2007 - 2015

Environmental Waste management
Associates
Project Manager and Director of
Remedial Investigation Services
1989 - 2007

Remediation / Metal Powder Manufacturer – Raritan, NJ, 2010 - 2013

Project Manager and LSRP for a Former Metal Powders and Pigments Manufacturer, Raritan Township, New Jersey, for the investigation and remediation of a metal powder and pigment manufacturer undergoing ISRA compliance for their cessation of operations and sale of the property. Remediation included delineation of ground water contaminants in several bedrock fracture zones and multiple injections of PerSulfox to treat the chlorinated volatile organic contaminants.

Remediation / Essex County Airport / Fairfield, NJ, 2012 - 2017

LSRP and Project Manager overseeing the investigation and remediation of the Essex County Airport in Fairfield, New Jersey. The site was historically owned and operated by Curtiss Wright as an airfield and airplane manufacturing facility. Over 90 different areas of concern were identified and investigated, including soils, former tanks and pits, discharges and former storage areas, and chlorinated groundwater contamination in both shallow and deep aquifers. Several AOCs have been remediated. The project is currently in the final stages of delineation and remediation of the remaining 13 AOCs including ground water.

Remediation / Karnak Corporation / Clark, NJ, 2012 - Present

LSRP for Karnak Corporation, a major manufacturer of roofing sealants and coatings in Clark, NJ. Industrial site with over 35 areas of concern including soils and ground water. Currently over-seeing the final stages of remediation at the site for both soil and ground water contamination associated with past manufacturing operations as well as the closure and remediation of former above ground tank farms, including excavation, sheeting and shoring, and dewatering for soil remediation activities.

Transaction Assessments / Real Estate Investment Trust / NJ, 1998 - 2005

Program Manager for the due diligence investigations of a portfolio of properties for a national Real Estate Investment Trust (REIT) including Phase I/Preliminary As-assessments and site investigations for proper-ty transactions and stock transfers

Compliance / North Jersey Fuel Supplier / NJ, 1992 - 2001

Project manager for multiple gas station underground storage tank sites for a North Jersey fuel supplier, including tank testing, removals, site and remedial investigations for closure and replacement of under-ground storage tanks.

Remediation / Commercial Developer / Cranford, NJ, 2009 - 2010

Project Manager and LSRP a developer in Cranford, NJ, involving the investigation of buried drums discovered during excavation for site redevelopment, including identification and characterization of potential contaminants and hazards as well as remediation to allow the redevelopment of the site to proceed.

Remediation / Industrial Real Estate Developer / Chatham, NJ, 1998 - 2001

Project Manager for an Industrial Real Estate Owner, conducted UST Closure and Remediation of a Former Gasoline Station in Chatham, NJ. Conducted site investigation and remediation of a site where a gasoline station had been operated by a major oil company, and USTs left in place. Conducted soil, groundwater and soil gas survey to delineate and characterize the contamination, including light non-aqueous phase liquid (LNAPL). Product recovery was implemented as an interim remedial action. A forensic investigation was performed including analysis of recovered product fingerprint profiling, extent of soil and groundwater contamination in consideration of aquifer characteristics and a reconstruction of the site history, Mr. Langewisch' s forensic investigation determined that a major oil company was responsible for the contamination found and has since assumed responsibility for the cleanup.

Transaction Assessments / Industrial Real Estate Developer / NJ, 2004 – 2012

Project Manager and Program Manager for a portfolio of industrial sites in North and Central New Jersey including preliminary assessments, ISRA compliance, and remedial investigations and design.

Remediation / Real Estate Developer / Paterson, NJ, 2017 - 2018

A private real estate developer had purchased a property in Paterson, New Jersey, without performing due diligence prior to the purchase. Several years after purchasing, the client received a Notice of Violation and Enforcement from NJDEP for an open leaking underground storage tank case at the property which was reported under New Jersey's Spill Act. The client contacted Mr. Langewisch to fulfill the requirement to retain an LSRP to conduct the remediation. Mr. Langewisch worked with the NJDEP Enforcement Case Manager to avoid fines and NJDEP Direct Oversight by fully investigating and remediating the soil and ground water contamination at the site and issuing a Response Action Outcome to close the case within one year.

Site Investigation and Remediation / Chemical Manufacturer / Paterson, NJ, 1999 - 2005

Investigation of soils and ground water at a chemical manufacturer in Paterson, New Jersey, including characterization and delineation of contaminated soils and ground water associated with chemical spills at the site. Delineation included off-site migration of contaminated ground water.

Site Investigation and Remediation / Former Dye Plant / Paterson, NJ, 2017 - 2018

Investigation of soils and ground water at a former dye plant in Paterson, New Jersey, including characterization and delineation of contaminated soils and ground water associated with spills at the site. Investigation was triggered by a cessation of operations under New Jersey's Industrial Site Recovery Act (ISRA) program, Delineation included off-site migration of contaminated ground water.

Site Investigation and Remediation / Service Station / Clifton, NJ 1997 – 1999

Investigation and remediation of a spill discovered upon closure and removal of underground storage tanks from a filling station in Clifton, NJ, triggering notification to NJDEP under New Jersey's Spill Act. Both impacted soils and ground water were identified, delineated, and remediated.

Site Investigation and Remediation / Former Curtiss Wright Plant / Paterson, NJ 1997 – 2005

Multiple areas of concern were identified and addressed, including former heating oil underground storage tanks, solvent tanks, and spill and discharge areas involving contamination of both soil and ground water at a former Curtiss Wright plant in Paterson, New Jersey.

Site Investigation and Consulting / Former Ringwood Mines NPL Site / Ringwood, NJ 2008 - 2012

Acted as environmental consultant to the Town of Ringwood, conducting sampling and oversight and review of the work being done for investigation and remediation of the former Ringwood Mines / Ford Mahwah Plant superfund site in Ringwood, New Jersey.

Lizett Jimenez

Staff Scientist

PROFESSIONAL EXPERIENCE

Ms. Jimenez is a staff scientist in Terracon's South Plainfield, New Jersey office. She has conducted Phase I Environmental Site Assessments (ESA), Phase II Investigations, New Jersey Preliminary Assessments, asbestos and lead-based paint inspections, and prepares the associated figures, reports, and proposals.

Ms. Jimenez has also conducted National Environmental Policy Act (NEPA) compliance evaluations and NEPA Environmental Assessments. Projects included small-cell installations, collocation projects, and new tower construction sites in New Jersey, Pennsylvania, Atlanta, Alabama, Louisiana, and Georgia. Services included report preparation, analysis of potential impact to wilderness areas, wildlife preservers, endangered species, historic properties, floodplains, wetlands, and other issues.

PROJECT EXPERIENCE

Remedial Investigation of Arsenic and Dieldrin Contamination – Ewing, New Jersey

Performed a Remedial Investigation (RI) in response to identified levels of arsenic and dieldrin in excess of applicable state remediation standards. A total of 39 soil samples were collected to delineate the vertical and horizontal soil contamination in accordance with NJDEP technical guidelines.

Asbestos Abatement Monitoring / Allegro Senior Living Facility – Harrington Park, New Jersey

Performed daily abatement monitoring and oversight services and performed daily and final air clearances. Project scope was completed over a three-month period and included the abatement of approximately: 2,000 square feet (SF) of floor tile and associated mastic; 10,218 SF of exterior transite panels; 1,600 SF of interior transite panels; and 800 linear feet (LF) of roof flashing.

Remedial Investigation Report/Remedial Action Report – Vineland, New Jersey

Performed a Phase I ESA which identified one on-site REC. A Limited Site Investigation (LSI) was performed to investigate potential releases of COCs in soil and groundwater. Discovered two

EDUCATION

Bachelor of Science, Environmental Sciences, Rutgers, State University, New Jersey, 2019

CERTIFICATIONS

OSHA 40-Hour Health and Safety Training Certification

OSHA 8-Hour Health and Safety Re-certification

ASHERA Certified Asbestos Inspector

New York State Mold Assessor

New York State Asbestos Inspector

Pennsylvania Asbestos Inspector

Maryland Asbestos Inspector

WORK HISTORY

Terracon Consultants, Inc.
Environmental Intern, 2018
Staff Scientist, 2019-present

Rutgers, State University
Internship in Production and Entrepreneurship Agriculture, 2018
Director's Office Assistant, 2014-2018

unregistered USTs and proceeded to complete a UST Permanent Removal from Service Report. An RI, Remedial Action Workplan, and a Remedial Action Report (RAR) were also completed to allow site regulatory closure under NJDEP regulations.

128-Node Small Cell Antenna Collocations and New Build Poles / French Quartet – New Orleans, Louisiana

Screened 128 node locations for NEPA and NHPA Small Cell Exclusions for Verizon Wireless sites. Completed NEPA Smartforms and a Section 106 Review, which included tribal, state, and local government consultation and a visual effects evaluation. A total of 23 historic-age resources were identified within the Area of Effects for the 128 sites.

APPENDIX F
DESCRIPTION OF TERMS AND ACRONYMS

Description of Selected General Terms and Acronyms

Term/Acronym	Description
ACM	<p>Asbestos Containing Material. Asbestos is a naturally occurring mineral, three varieties of which (chrysotile, amosite, crocidolite) have been commonly used as fireproofing or binding agents in construction materials. Exposure to asbestos, as well as ACM, has been documented to cause lung diseases including asbestosis (scarring of the lung), lung cancer and mesothelioma (a cancer of the lung lining).</p> <p>Regulatory agencies have generally defined ACM as a material containing greater than one (1) percent asbestos, however some states (e.g. California) define ACM as materials having 0.1% asbestos. In order to define a homogenous material as non-ACM, a minimum number of samples must be collected from the material dependent upon its type and quantity. Homogenous materials defined as non-ACM must either have 1) no asbestos identified in all of its samples or 2) an identified asbestos concentration below the appropriate regulatory threshold. Asbestos concentrations are generally determined using polarized light microscopy or transmission electron microscopy. Point counting is an analytical method to statistically quantify the percentage of asbestos in a sample. The asbestos component of ACM may either be friable or non-friable. Friable materials, when dry, can be crumbled, pulverized, or reduced to powder by hand pressure and have a higher potential for a fiber release than non-friable ACM. Non-friable ACM are materials that are firmly bound in a matrix by plastic, cement, etc. and, if handled carefully, will not become friable.</p> <p>Federal and state regulations require that either all suspect building materials be presumed ACM or that an asbestos survey be performed prior to renovation, dismantling, demolition, or other activities that may disturb potential ACM. Notifications are required prior to demolition and/or renovation activities that may impact the condition of ACM in a building. ACM removal may be required if the ACM is likely to be disturbed or damaged during the demolition or renovation. Abatement of friable or potentially friable ACM must be performed by a licensed abatement contractor in accordance with state rules and NESHAP. Additionally, OSHA regulations for work classification, worker training and worker protection will apply.</p>
AHERA	Asbestos Hazard Emergency Response Act
AST	Aboveground Storage Tanks. ASTs are generally described as storage tanks less than 10% of which are below ground (i.e., buried). Tanks located in a basement, but not buried, are also considered ASTs. Whether, and the extent to which, an AST is regulated, is determined on a case-by-case basis and depends upon tank size, its contents and the jurisdiction of its location.
BGS	Below Ground Surface
Brownfields	State and/or tribal listing of Brownfield properties addressed by Cooperative Agreement Recipients or Targeted Brownfields Assessments.
BTEX	Benzene, Toluene, Ethylbenzene, and Xylenes. BTEX are VOC components found in gasoline and commonly used as analytical indicators of a petroleum hydrocarbon release.
CERCLA	Comprehensive Environmental Response, Compensation and Liability Act (a.k.a. Superfund). CERCLA is the federal act that regulates abandoned or uncontrolled hazardous waste sites. Under this Act, joint and several liabilities may be imposed on potentially responsible parties for cleanup-related costs.
CERCLIS	Comprehensive Environmental Response, Compensation and Liability Information System. An EPA compilation of sites having suspected or actual releases of hazardous substances to the environment. CERCLIS also contains information on site inspections, preliminary assessments and remediation of hazardous waste sites. These sites are typically reported to EPA by states and municipalities or by third parties pursuant to CERCLA Section 103.
CESQG	Conditionally exempt small quantity generators.
CFR	Code of Federal Regulations

Description of Selected General Terms and Acronyms (cont.)

<i>Term/Acronym</i>	<i>Description</i>
CREC	Controlled Recognized Environmental Condition is defined in ASTM E1527-13 as “a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority) , with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the environmental professional to be a controlled recognized environmental condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a recognized environmental condition in the conclusions section of the Phase I Environmental Site Assessment report.”
DOT	U.S. Department of Transportation
EPA	U.S. Environmental Protection Agency
ERNS	Emergency Response Notification System. An EPA-maintained federal database which stores information on notifications of oil discharges and hazardous substance releases in quantities greater than the applicable reportable quantity under CERCLA. ERNS is a cooperative data-sharing effort between EPA, DOT, and the National Response Center.
ESA	Environmental Site Assessment
FRP	Fiberglass Reinforced Plastic
Hazardous Substance	As defined under CERCLA, this is (A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, mixture, solution, or substance designated pursuant to section 9602 of this title; (C) any hazardous waste having characteristics identified under or listed pursuant to section 3001 of the Solid Waste Disposal Act (with some exclusions); (D) any toxic pollutant listed under section 1317(a) of Title 33; (E) any hazardous air pollutant listed under section 112 of the Clean Air Act; and (F) any imminently hazardous chemical substance or mixture with respect to which the EPA Administrator has taken action under section 2606 of Title 15. This term does not include petroleum, including crude oil or any fraction thereof which is not otherwise listed as a hazardous substance under subparagraphs (A) through (F) above, and the term include natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).
Hazardous Waste	This is defined as having characteristics identified or listed under section 3001 of the Solid Waste Disposal Act (with some exceptions). RCRA, as amended by the Solid Waste Disposal Act of 1980, defines this term as a “solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may (A) cause, or significantly contribute to an increase in mortality or an increase in serious irreversible, or incapacitating reversible illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed.”
HREC	Historical Recognized Environmental Condition is defined in ASTM E1527-13 as “a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time of the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a recognized environmental condition at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a recognized environmental condition.”

Description of Selected General Terms and Acronyms (cont.)

<i>Term/Acronym</i>	<i>Description</i>
IC/EC	A listing of sites with institutional and/or engineering controls in place. IC include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. EC include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.
ILP	Innocent Landowner/Operator Program
LQG	Large quantity generators.
LUST	Leaking Underground Storage Tank. This is a federal term set forth under RCRA for leaking USTs. Some states also utilize this term.
MCL	Maximum Contaminant Level. This Safe Drinking Water concept (and also used by many states as a ground water cleanup criteria) refers to the limit on drinking water contamination that determines whether a supplier can deliver water from a specific source without treatment.
MSDS	Material Safety Data Sheets. Written/printed forms prepared by chemical manufacturers, importers and employers which identify the physical and chemical traits of hazardous chemicals under OSHA's Hazard Communication Standard.
NESHAP	National Emissions Standard for Hazardous Air Pollutants (Federal Clean Air Act). This part of the Clean Air Act regulates emissions of hazardous air pollutants.
NFRAP	Facilities where there is "No Further Remedial Action Planned," as more particularly described under the Records Review section of this report.
NOV	Notice of Violation. A notice of violation or similar citation issued to an entity, company or individual by a state or federal regulatory body indicating a violation of applicable rule or regulations has been identified.
NPDES	National Pollutant Discharge Elimination System (Clean Water Act). The federal permit system for discharges of polluted water.
NPL	The NPL is the EPA's database of uncontrolled or abandoned hazardous waste facilities that have been listed for priority remedial actions under the Superfund Program.
OSHA	Occupational Safety and Health Administration or Occupational Safety and Health Act
PACM	Presumed Asbestos-Containing Material. A material that is suspected of containing or presumed to contain asbestos but which has not been analyzed to confirm the presence or absence of asbestos.
PCB	Polychlorinated Biphenyl. A halogenated organic compound commonly in the form of a viscous liquid or resin, a flowing yellow oil, or a waxy solid. This compound was historically used as dielectric fluid in electrical equipment (such as electrical transformers and capacitors, electrical ballasts, hydraulic and heat transfer fluids), and for numerous heat and fire sensitive applications. PCB was preferred due to its durability, stability (even at high temperatures), good chemical resistance, low volatility, flammability, and conductivity. PCBs, however, do not break down in the environment and are classified by the EPA as a suspected carcinogen. 1978 regulations, under the Toxic Substances Control Act, prohibit manufacturing of PCB-containing equipment; however, some of this equipment may still be in use today.
pCi/L	Pico Curies per Liter of Air. Unit of measurement for Radon and similar radioactive materials.
PLM	Polarized Light Microscopy (see ACM section of the report, if included in the scope of services)
PST	Petroleum Storage Tank. An AST or UST that contains a petroleum product.

Description of Selected General Terms and Acronyms (cont.)

Term/Acronym	Description
Radon	A radioactive gas resulting from radioactive decay of naturally-occurring radioactive materials in rocks and soils containing uranium, granite, shale, phosphate, and pitchblende. Radon concentrations are measured in Pico Curies per Liter of Air. Exposure to elevated levels of radon creates a risk of lung cancer; this risk generally increases as the level of radon and the duration of exposure increases. Outdoors, radon is diluted to such low concentrations that it usually does not present a health concern. However, radon can accumulate in building basements or similar enclosed spaces to levels that can pose a risk to human health. Indoor radon concentrations depend primarily upon the building's construction, design and the concentration of radon in the underlying soil and ground water. The EPA recommended annual average indoor "action level" concentration for residential structures is 4.0 pCi/l.
RCRA	Resource Conservation and Recovery Act. Federal act regulating solid and hazardous wastes from point of generation to time of disposal ("cradle to grave"). 42 U.S.C. 6901 et seq.
RCRA Generators	The RCRA Generators database, maintained by the EPA, lists facilities that generate hazardous waste as part of their normal business practices. Generators are listed as either large (LQG), small (SQG), or conditionally exempt (CESQG). LQG produce at least 1000 kg/month of non-acutely hazardous waste or 1 kg/month of acutely hazardous waste. SQG produce 100-1000 kg/month of non-acutely hazardous waste. CESQG are those that generate less than 100 kg/month of non-acutely hazardous waste.
RCRA CORRACTS/TSDs	The USEPA maintains a database of RCRA facilities associated with treatment, storage, and disposal (TSD) of hazardous materials which are undergoing "corrective action". A "corrective action" order is issued when there is a release of hazardous waste or constituents into the environment from a RCRA facility.
RCRA Non-CORRACTS/TSDs	The RCRA Non-CORRACTS/TSD Database is a compilation by the USEPA of facilities which report storage, transportation, treatment, or disposal of hazardous waste. Unlike the RCRA CORRACTS/TSD database, the RCRA Non-CORRACTS/TSD database does not include RCRA facilities where corrective action is required.
RCRA Violators List	RAATS. RCRA Administrative Actions Taken. RAATS information is now contained in the RCRIS database and includes records of administrative enforcement actions against facilities for noncompliance.
RCRIS	Resource Conservation and Recovery Information System, as defined in the Records Review section of this report.
REC	Recognized Environmental Conditions are defined by ASTM E1527-13 as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment; 2) under conditions indicative of a release to the environment. <i>De minimis</i> conditions are not recognized environmental conditions."
SCL	State "CERCLIS" List (see SPL /State Priority List, below).
SPCC	Spill Prevention, Control and Countermeasures. SPCC plans are required under federal law (Clean Water Act and Oil Pollution Act) for any facility storing petroleum in tanks and/or containers of 55-gallons or more that when taken in aggregate exceed 1,320 gallons. SPCC plans are also required for facilities with underground petroleum storage tanks with capacities of over 42,000 gallons. Many states have similar spill prevention programs, which may have additional requirements.
SPL	State Priority List. State list of confirmed sites having contamination in which the state is actively involved in clean up activities or is actively pursuing potentially responsible parties for clean up. Sometimes referred to as a State "CERCLIS" List.
SQG	Small quantity generator.
SWF/LF	State and/or Tribal database of solid waste/Landfill facilities. The database information may include the facility name, class, operation type, area, estimated operational life, and owner.
TPH	Total Petroleum Hydrocarbons
TRI	Toxic Release Inventory. Routine EPA report on releases of toxic chemicals to the environment based upon information submitted by entities subject to reporting under the Emergency Planning and Community Right to Know Act.

Description of Selected General Terms and Acronyms (cont.)

<i>Term/Acronym</i>	<i>Description</i>
TSCA	Toxic Substances Control Act. A federal law regulating manufacture, import, processing and distribution of chemical substances not specifically regulated by other federal laws (such as asbestos, PCBs, lead-based paint and radon). 15 U.S.C 2601 et seq.
USACE	United States Army Corps of Engineers
USC	United States Code
USGS	United States Geological Survey
USNRCS	United States Department of Agriculture-Natural Resource Conservation Service
UST	Underground Storage Tank. Most federal and state regulations, as well as ASTM E1527-13, define this as any tank, incl., underground piping connected to the tank, that is or has been used to contain hazardous substances or petroleum products and the volume of which is 10% or more beneath the surface of the ground (i.e., buried).
VCP	State and/or Tribal facilities included as Voluntary Cleanup Program sites.
VOC	Volatile Organic Compound
Wetlands	<p>Areas that are typically saturated with surface or ground water that creates an environment supportive of wetland vegetation (i.e., swamps, marshes, bogs). The <u>Corps of Engineers Wetlands Delineation Manual</u> (Technical Report Y-87-1) defines wetlands as areas inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. For an area to be considered a jurisdictional wetland, it must meet the following criteria: more than 50 percent of the dominant plant species must be categorized as Obligate, Facultative Wetland, or Facultative on lists of plant species that occur in wetlands; the soil must be hydric; and, wetland hydrology must be present.</p> <p>The federal Clean Water Act which regulates “waters of the US,” also regulates wetlands, a program jointly administered by the USACE and the EPA. Waters of the U.S. are defined as: (1) waters used in interstate or foreign commerce, including all waters subject to the ebb and flow of tides; (2) all interstate waters including interstate wetlands; (3) all other waters such as intrastate lakes, rivers, streams (including intermittent streams), mudflats, sandflats, wetlands, sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds, etc., which the use, degradation, or destruction could affect interstate/ foreign commerce; (4) all impoundments of waters otherwise defined as waters of the U. S., (5) tributaries of waters identified in 1 through 4 above; (6) the territorial seas; and (7) wetlands adjacent to waters identified in 1 through 6 above. Only the USACE has the authority to make a final wetlands jurisdictional determination.</p>
