Dear Mr. Murphy:

Whitestone Associates, Inc. (Whitestone) is pleased to submit for your review the attached *Summary Report of Findings - Phase I Environmental Site Assessment Update* for the above-referenced property.

Please contact us with any questions or comments regarding the enclosed report.

Sincerely,

WHITESTONE ASSOCIATES, INC.

SECTION 1.0

Summary of Findings

Whitestone Associates, Inc. (Whitestone) was retained by Ferber Construction Management North, LLC to conduct a Phase I Environmental Site Assessment Update (ESAU) of the vacant parcel comprising 100 and 108 Egg Harbor Road in Washington Township and 203 Blackwood Barnsboro Road in Deptford Township, Gloucester County, New Jersey (hereinafter referred to as the "site" or the "subject property"). Investigatory activities were completed by Whitestone between January 20, 2021 and February 18, 2021. The site reconnaissance was conducted on February 5, 2021. This ESAU supplements and updates Whitestone's previous environmental investigation efforts as reported in the October 15, 2018 *Summary Report of Findings – Phase I Environmental Site Assessment* and April 2, 2019 *Summary Report of Findings – Phase II Site Investigation (SI)*.

This document serves as the Phase I ESAU report for this property. Whitestone conducted the Phase I ESAU of the subject property in conformance with the scope and limitations of the American Society of Testing Materials (ASTM) *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (E1527-13). Any exceptions to or deletions from this practice are described in Sections 2.5 and 7.4 of this report. As part of the Phase I ESA, Whitestone sought to evaluate the presence or absence of **recognized environmental conditions** (RECs), **controlled RECs** (CRECs), and **historical RECs** (HRECs) in connection with the subject property in connection with the subject property.

RECs include the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property under conditions that indicate an existing release, a past release, or a material threat of a future release to the environment. **This assessment revealed no evidence of RECs in connection with the subject property.**

CRECs include the past release of any hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of engineering controls, institutional controls, and/or activity/use limitations. **This assessment revealed no evidence of CRECs in connection with the subject property.**

HRECs include the past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority without subjecting the property to any controls or use limitations. **This assessment revealed no evidence of HRECs in connection with the subject property.**

Items identified as *business environmental risks* (BERs) are summarized in Section 7.1.4 of this report.

SECTION 2.0 Introduction

2.1 Location & Legal Description

The subject property comprises approximately 4.977 acres of vacant land located at 100 and 108 Egg Harbor Road in Washington Township and 203 Blackwood Barnsboro Road in Deptford Township, Gloucester County, New Jersey, Latitude 39.7831840 North, Longitude -75.1001340 West. The property is identified further as Block 7, portion of Lot 6.02; Block 7.04, Lot 6; and Block 386.12, Lot 12. Whitestone understands that the northwestern portion of the subject property is proposed for redevelopment with a 5,585-square foot Wawa food market, fueling canopy, underground storage tanks (USTs) and associated fuel dispensers as depicted on the last revised January 8, 2021 *Site Plan C-5* prepared by Stonefield Engineering & Design, LLC (Stonefield). The southern portion of the subject property is proposed for development with a 3,235-square foot restaurant building, and the northeastern portion of the site will be improved with an aboveground stormwater management (SWM) basin. The site location is shown in Figures 1 and 2 and illustrated in Appendix 1, Site Photographs.

2.2 Purpose

The purpose of this Phase I ESAU is to provide an appropriate inquiry to the previous and current ownership and uses of the property consistent with the American Society of Testing Materials (ASTM) *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (E1527-13).

2.3 Scope of Services

Whitestone's Scope of Services in connection with this Phase I ESAU included the following actions in general accordance with Whitestone's January 20, 2021 verbal correspondence with Mr. Michael Murphy of The Ferber Company, Inc.:

- ▶ reviewing readily-available federal, state, and local records through electronic database searches and *Open Public Records Act* (OPRA) document requests;
- ▶ reviewing a chain of title, including an environmental lien search (if provided by the client);
- ▶ a site reconnaissance;
- ▶ Sanborn Fire Insurance Map, aerial photograph, historical topographic map, and City Directory Search evaluation and interpretation;
- ▶ interviews with knowledgeable representatives; and

- ▶ summary report generation.

2.4 Significant Assumptions

Whitestone assumes all information provided by the client, public officials, knowledgeable representatives, or others noted in this report to be factual unless otherwise contradicted or documented.

2.5 Limitations & Exceptions

The goal of an ESA is to identify recognized environmental conditions at the subject site. With this in mind, Whitestone seeks to investigate the presence or likely presence of hazardous substances or petroleum products in, on, or at a property under conditions that indicate an existing release, a past release, or a material threat of a future release to the environment. This assessment includes a discussion of hazardous substances and petroleum products that are present at the property and are in compliance with appropriate regulations governing their storage and use.

This Phase I ESAU does not include an extensive evaluation of *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be subject to enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not RECs or CRECs, however, certain *business environmental risks* and *de minimis* conditions as well as recommendations for further action, if appropriate, are summarized in Section 7.1.4 of this Phase I ESAU report.

The Phase I ESAU is intended to permit the *user* to satisfy one of the requirements to qualify for the *innocent landowner*, *contiguous property owner*, or *bona fide prospective purchaser* limitations on CERCLA liability: that is, the practice that constitutes “*all appropriate inquiry* into the previous ownership and uses of the property consistent with good commercial or customary practice” as defined at 42 U.S.C. 9601(35)(B) and as defined in ASTM Standard Practice E1527-13.

Based on information generated during this Phase I ESAU, prior County Conservation Company operations at the site were conducted under North American Industry Classification System (NAICS) Code 423930 pertaining to Recyclable Material Merchant Wholesalers. This NAICS Code is not subject to the property-transfer related obligations of New Jersey’s *Industrial Site Recovery Act* (ISRA).

This Phase I ESAU is designed to satisfy AAI and ASTM Standard Practice E1527-13. This Phase I ESAU does not include a Preliminary Assessment (PA) in accordance with New Jersey’s *Technical Requirements for Site Remediation* (N.J.A.C. 7:26E-3.1 and 3.2) and associated NJDEP technical guidance. A PA is required to maintain an innocent purchaser defense pursuant to New Jersey’s *Spill Compensation and Control Act*.

2.6 Special Terms & Conditions

This Phase I ESAU has been conducted in accordance with ASTM E1527-13, and no special terms and conditions have been included in this Phase I ESAU report.

2.7 User Reliance

Ferber Construction Management North, LLC, their successors, representatives, and/or assigns may rely upon the findings and conclusions of this document. This document was prepared for the sole use of Ferber Construction Management North, LLC, their successors, representatives, and assigns, and should not be relied upon by any third party without Whitestone's written consent.

SECTION 3.0

User Provided Information

3.1 User Questionnaire

The User provided the following responses pertaining to the subject property. A copy of the completed *User Questionnaire* is included in Appendix 8.

Question	Response
Name of Preparer and User Entity	Michael J. Murphy, Vice Present of Entitlements & Construction, Ferber Company Management North, LLC
Did a search of <i>recorded land title records</i> identify an environmental lien filed or recorded against the property under federal, tribal, state or local law?	Not to my knowledge.
Did a search of <i>recorded land title records</i> identify any activity and use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	Not to my knowledge.
Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	No.
Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	Yes, the purchase price is fair market value in my opinion.
Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user:	
Do you know the past uses of the property?	No knowledge of past uses of the property.
Do you know of specific chemicals that are present or once were present at the property?	No.
Do you know of spills or other chemical releases that have taken place at the property?	No.
Do you know of any environmental cleanups that have taken place at the property?	No.
Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of releases at the property?	No.

3.2 Recorded Land Title Records

Current recorded land title records were not provided for review by the User, however, Whitestone reviewed the March 15, 2019 *ALTA Commitment for Title Insurance* prepared by the Chicago Title Insurance Company (File No. ACQ-9780L-17). Review of the recorded land title records did not identify environmental liens or AULs pertinent to the subject property.

3.3 Reason for Conducting this Phase I ESA

According to the User, this Phase I ESAU was conducted as part of environmental due diligence related to purchasing the subject property for redevelopment with a 5,585-square foot Wawa food market, fueling canopy, USTs and associated fuel dispensers as depicted Stonefield's *Site Plan C-5* last revised on January 8, 2021. The southern portion of the subject property is proposed for development with a 3,235-square foot restaurant building, and the northeastern portion of the site will be improved with an aboveground SWM basin.

SECTION 4.0 Records Review

4.1 Regulatory Records Review

Whitestone obtained regulatory database information compiled from Environmental Data Resources, Inc. (EDR) by a variety of federal and state regulatory agencies as summarized in the table below. A copy of the database report is included in Appendix 2.

Type	Regulatory Agency Database	Approximate Minimum Search Distance (AMSD)	Number of Sites within AMSD
Federal	National Priority List (NPL) Sites	1 mile	0
Federal	Delisted National Priority List (DNPL) Sites	½ mile	0
Federal	Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) Sites	½ mile	0
Federal	CERCLIS No Further Remediation Action Planned (NFRAP) Sites	subject property and adjoining properties	0
Federal	Resource Conservation and Recovery Act (RCRA) Corrective Action Report (CORRACTS) Sites	1 mile	0
Federal	RCRA non-CORRACTS Treatment, Storage or Disposal (TSD) Sites	½ mile	0
Federal	RCRA Large Quantity Generators (LQG) Sites	subject property and adjoining properties	0
Federal	RCRA Small Quantity Generators (SQG) Sites	subject property and adjoining properties	0
Federal	RCRA Conditionally Exempt Small Quantity Generators (CESQG) Sites	subject property and adjoining properties	0
Federal	RCRA Non-Generators (NON-GEN) Sites	subject property and adjoining properties	0
Federal	US Brownfield Sites	½ mile	0
Federal	Institutional Control/Engineering Control Registries	subject property	0
Federal	Environmental Response and Notification System (ERNS)	subject property	0
State & Tribal	Hazardous Waste Sites (HWS) (equivalents to NPL and CERCLIS)	1 mile	12
State & Tribal	Delisted Hazardous Waste Sites (HWS)	1 mile	0
State & Tribal	Solid Waste Facilities/Landfill (SWLF) Sites	½ mile	0
State & Tribal	Historical Landfill (HIST LF) Sites	½ mile	0
State & Tribal	Leaking Underground Storage Tank (LUST) Sites	½ mile	9

Type	Regulatory Agency Database	Approximate Minimum Search Distance (AMSD)	Number of Sites within AMSD
State & Tribal	Registered Underground Storage Tank (UST) Sites	subject property and adjoining properties	5
State & Tribal	Institutional Control/Engineering Control Registries	subject property	0
State & Tribal	Brownfield Sites	½ mile	3
State	Baseline Environmental Assessment (BEA) Sites	½ mile	0
Either	Unmappable Database Listings (a.k.a. Orphan Sites)	database-dependent	16

4.1.1 Subject Property & Occupant Listings

The subject property or its known prior occupants are not identified in the referenced databases.

4.1.2 Adjoining & Nearby Sites

Whitestone's review of the referenced databases also considered the potential or likelihood of contamination migrating to the subject property from adjoining and nearby sites. To evaluate which of the adjoining and nearby sites identified in the regulatory database report present an environmental risk to the subject property, Whitestone considered the following criteria:

- ▶ the type of database on which the site is identified;
- ▶ the topographic position of the identified site relative to the subject property;
- ▶ the direction and distance of the identified site from the subject property;
- ▶ local soil conditions in the subject property area;
- ▶ the known or inferred groundwater flow direction in the subject property area;
- ▶ the status of the respective regulatory agency-required investigation(s) of the identified site, if any; and
- ▶ surface and subsurface obstructions and diversions (e.g., buildings, roads, sewer systems, utility service lines, rivers, lakes, and ditches) located between the identified site and the subject property.

Only those sites that are judged to present a potential environmental risk to the subject property and/or warrant additional clarification are evaluated further. Using the referenced criteria, and based upon a review of readily available information contained within the regulatory database report, Whitestone identified the following adjoining or nearby sites listed in the regulatory database report that were judged to present a potential environmental risk to the subject property:

- ▶ Mullary's Texaco, Mullary's Fast Fuels, Inc. and Five Points Gas Station, located at 108 Delsea Drive approximately 113 feet topographically sidegradient from the subject property, is identified on the HIST LUST, SPILLS, HIST AUTO, SHWS, UST, and LUST databases. These database listings appear to be associated with historic automobile service operations, registered USTs, and two contaminant releases. One release (Case No. 01-12-06-1331-44) of an unknown quantity of an unknown material that occurred on December 5, 2001 resulted in soil and groundwater contamination. An additional release (Case No. 17-06-09-1233-23) of an unknown quantity of unknown material occurred at this site on May 30, 2017. Environmental impacts associated with this release were not specified in EDR. This nearby site currently is occupied by an Exxon Mobile Station.

- ▶ A nearby site located at 116 Delsea Drive approximately 295 feet topographically sidegradient from the subject property is identified on the VCP and NJ RELEASE databases. One release (Case No. 02-07-05-1119-23) of an unknown quantity of an unknown material that occurred on May 7, 2002 resulted in groundwater contamination. No further information regarding this incident was available in EDR.

- ▶ Spotless Cleaners, Inc. located at 1898 Hurffville Road approximately 243 feet topographically sidegradient from the subject property is identified on the HIST CLEANER database. This database listing is associated with drycleaning operations between at least 2000 and 2014.

- ▶ Former BP S/SC#00922 and 5 Points BP Service Station located at 109 Delsea Drive topographically sidegradient from the subject property is identified on the HIST LUST, INST CONTROL, NJEMS, and AIRS databases. No Further Action (NFA) determination was issued for the leaking UST (Case No. 89-11-14-1143) on June 6, 1992. Furthermore, a Classification Exception Area (CEA) for groundwater contamination from toluene and xylenes was established at this site on March 30, 2002. This CEA measures approximately 600 feet wide by 850 feet long by 85 feet deep and does not encroach on the subject property, however, contaminant migration associated with this CEA onto the subject property is possible. No other significant information regarding these database listings was available in EDR. This nearby site currently is occupied by a Gas Stop.

Whitestone's 2019 Phase II SI of the subject property (discussed further in Section 4.3) evaluated potential vapor intrusion and off-site contamination migration concerns. Laboratory analyses of groundwater and soil gas samples collected during the SI did not detect volatile organics (VOs) at concentrations exceeding NJDEP's Groundwater Quality Standards (GWQS) and/or Vapor Intrusion Screening Levels (VIGSL). Furthermore, the sites appear to be located hydraulically downgradient and/or sidegradient of the subject property, as determined from Whitestone's groundwater gauging activities. Based on these findings, off-site vapor migration/vapor intrusion is not anticipated to be a concern at the subject property. Liability associated with impacts (if any) would remain the responsibility of the owner/operator of the site(s) from which contamination is emanating.

4.2 Additional Environmental Record Sources

The following federal, state and local regulatory agencies were contacted with a request to access files regarding the property pursuant to OPRA (see Appendix 3):

1. **United States Environmental Protection Agency (USEPA)**
Submitted electronically via <http://www.epa.gov/myproperty/>
2. **New Jersey Department of Environmental Protection (NJDEP)**
Submitted electronically via <http://www.njdep.oprarequest/>
3. **Gloucester County**
Submitted electronically via <http://www.co.gloucester.nj.us/act/opra>
4. **Washington Township**
522 Egg Harbor Road
Sewell, New Jersey 08080
5. **Deptford Township**
1011 Cooper Street
Deptford, New Jersey 08096

Responses from the OPRA requests received to date include the following:

Whitestone searched the USEPA *Facility Registry Service* database on January 25, 2021. No records pertaining to the subject property were identified.

In three email responses dated January 27, 2021, February 1, 2021, and February 2, 2021, NJDEP personnel informed Whitestone that NJDEP does not maintain files in connection with 100 and 108 Egg Harbor Road and 203 Blackwood Barnsboro Road.

To date, responses have not been received from Gloucester County, Washington Township, or Deptford Township. Additional pertinent information (if any) generated in response to these requests will be provided in a supplement to this report.

4.3 Environmental Document Review

Whitestone's prior October 15, 2018 Phase I ESA did not identify RECs, CRECs or HRECs. The ESA identified several off-site properties as vapor encroachment concerns (VECs) and several BERs warranting further investigation, including the subject property's historic agricultural use, potential fill material, and the possibility for a remnant UST associated with the former Lot 12 residential structure to remain on site. Based on these findings, Whitestone conducted Phase II SI field activities between

November 19, 2018 and December 5, 2018, including a ground penetrating radar (GPR) survey, installing three permanent groundwater monitoring wells, and collecting soil vapor, soil and groundwater samples. Whitestone's April 2, 2019 Phase II SI report findings included the following:

- ▶ Subsurface GPR anomalies consistent with water, gas, storm sewer, and electric utilities were detected at the subject property. No additional anomalies were identified. Due to site-specific soil conditions, the GPR unit was limited to approximately two feet to four feet of subsurface penetration. The GPR equipment was not effective or had limited or no accessibility within areas of miscellaneous staged equipment/materials and mulch stockpiles.
- ▶ Elevated photoionization detector (PID) readings and odors were not encountered in the Phase II SI borings. Elevated PID readings were not encountered within the outer and inner casings of the monitor wells during the monitor well sampling event.
- ▶ Monitor well MW03, advanced in the northern portion of the site, encountered fill material extending to a depth of 5.5 feet below ground surface (fbgs). The fill material consisted of apparent non-native soil without debris.
- ▶ The pesticide dieldrin was detected in soil sample 9999-23-SB06-SL01-11202018 at a concentration exceeding its NJDEP Default Impact to Groundwater Soil Screening Level (DIGWSSL). To further evaluate the Impact to Groundwater Pathway, Synthetic Precipitation Leaching Procedure (SPLP) dieldrin analyses was conducted on the soil sample. The subsequent SPLP results confirmed that dieldrin was not detected in the soil sample above the laboratory reporting limit (RL) or NJDEP Default Leachate Criterion. Accordingly, the total dieldrin concentration analyzed for SPLP was determined to be the Sample-Specific Impact to Groundwater Soil Remediation Standard (SRS) for this sample location (0.0051 ppm).
- ▶ VOs, semi volatile organics/base neutrals (SVO/BNs), polychlorinated biphenyls (PCBs), Target Analyte List (TAL) metals, herbicides, arsenic, lead, and extractable petroleum hydrocarbons (EPH) were not detected at concentrations exceeding applicable NJDEP Soil Remediation Criterion (SRC), SRS, and/or DIGWSSL.
- ▶ The metals aluminum, arsenic, beryllium, chromium, lead, mercury, nickel, iron, manganese, and/or sodium were detected in groundwater samples 9999-23-MW01-GW01-12052018, 9999-23-MW02-GW01-12052018, and 9999-23-MW03-GW01-12052018 at concentrations exceeding NJDEP GWQS. These metal detections are suspected to be naturally occurring.
- ▶ VOs and SVO/BNs were not detected at concentrations exceeding NJDEP GWQS or VIGSL.
- ▶ Laboratory analyses of soil gas samples did not detect VOs at concentrations exceeding NJDEP Residential or Non-Residential VISGSL.
- ▶ Groundwater beneath the site appears to flow in a northwesterly direction and was measured in monitor wells at depths ranging between 30.08 feet below top of casing (fbtoc) and 35.80 fbtoc.

4.4 Physical Setting Sources

Physical Setting Information		Source
Topography		
Average Site Elevation	Approximately 119 feet above mean sea level (msl)	2014 <i>USGS Topographic Map, Runnemede, New Jersey</i>
Surface Runoff/ Topographic Gradient	Generally sloping towards the northeast	
Soil Characteristics		
Soil Type	UdauB—Udorthents-Urban land complex; SabC—Sassafras loamy sand	USDA NRCS <i>Web Soil Survey</i> accessed January 25, 2021
Description	Fill and/or disturbed original soil material; Loamy and/or gravelly fluviomarine deposits	
Geology/Hydrogeology		
Formation	Bridgeton Formation	USGS <i>Bedrock Geologic Map of New Jersey</i> dated 1998
Description	Poorly sorted sand to silty quartz sand containing scattered gravel beds	
Estimated Depth to First Occurrence of Groundwater	30.08 fbtoc to 35.80 fbtoc*	Whitestone's April 2, 2019 Phase II SI
Hydrogeologic Gradient	Northwest	

* Recorded on November 19, 2018 and November 20, 2018 in on-site monitoring wells.

4.5 Historical Use Information

Location	Period	Description of Site Operations & Occupants
Subject Property:	At least 1931 - 2003	Residential structure on Lot 12 in the northern portion of the subject property. Lot 12 currently consists of vacant land.
	At least 1931 - 1950's	Agricultural land.
	1960's - 1990's	Borrow pit for sands. Blackwood Barnsboro Road was constructed through the northwestern portion of the site by 1965.
	1990's - 2020	County Conservation Company business.
	2020 - Present	Vacant land/pad site for planned commercial redevelopment. Blackwood Barnsboro Road no longer traverses the northwestern portion of the subject property and was redirected along the eastern site boundary.
To North:	At least 1931 - 1960's	Primarily agricultural land with sparse residential/farm structures.
	1960's - Present	Increase in commercial and residential development.
To East:	At least 1931 - 1950's	Primarily agricultural land with sparse residential/farm structures.
	1950's - 1990's	Borrowing pit for sands on adjoining eastern property.
	1990's - Present	County Conservation Company on adjoining eastern property.
To South:	At least 1931 - 1980's	Primarily agricultural land with sparse residential/farm structures.
	1960's - Present	Increase in commercial development.

	2000's - Present	County Conservation Company on adjoining southeastern property.
To West:	At least 1931 - 1980's	Primarily agricultural land with sparse residential/farm structures.
	1960's - Present	Increase in commercial development.

4.5.1 Fire Insurance Maps

Sanborn Fire Insurance Maps were requested, however, Sanborn coverage is not available in the immediate area encompassing the subject property (see Appendix 4).

4.5.2 Aerial Photograph Evaluation

Aerial photographs depicting the subject property were reviewed for the years 1931, 1940, 1944, 1951, 1959, 1962, 1965, 1971, 1974, 1981, 1995, 2006, 2010, 2013, 2017, 2019 and 2020. A summary of the aerial photos is outlined below. Copies of the photos obtained from EDR (1931 through 2017) are included as Appendix 5.

- 1931:** In 1931, the subject property, adjoining properties, and general area surrounding the site primarily consisted of agricultural land. A residential structure was observed on Lot 12 in the northern portion of the subject property. The present-day Egg Harbor Road and Blackwood Barnsboro Road bordered the site to the west and north, respectively.
- 1940 - 1951:** No significant changes from 1931 were observed at the subject property, adjoining properties, or general area surrounding the site.
- 1959:** By 1959, a suspected excavation for sand quarrying extended across the eastern site boundary. No other significant changes from 1951 were observed.
- 1962:** By 1962, the excavation area extended to the southern-central portion of the subject property. An increase in commercial development was observed to the northwest.
- 1965:** By 1965, Blackwood Barnsboro Road had been redirected to transect the northwestern portion of the site. No other significant changes from 1962 were observed.
- 1971:** No significant changes from 1965 were observed at the subject property. An increase in commercial development had occurred at the adjoining site to the west.
- 1974:** By 1974, a suspected swimming pool had been installed at the residential property on Lot 12. An increase in commercial development had occurred at the adjoining site to the west.
- 1981:** No significant changes from 1974 were observed at the subject property or adjoining properties. An increase in commercial development had occurred to the northwest of the site.

- 1995:** No significant changes from 1981 were observed at the subject property. An increase in commercial development had occurred at the adjoining site to the west and general area to the north.
- 2006:** By 2006, County Conservation Company material stockpiling operations were apparent across the eastern portion of the site and adjoining property to the east. The Lot 12 residential dwelling had been demolished. An increase in commercial and residential development was observed in the surrounding areas to the north, west, and south of the subject property.
- 2010:** By 2010, stockpile areas at the subject site and the adjoining eastern property had been reconfigured, and the County Conservation Company facility had expanded to the adjoining southeastern property. A slight increase in commercial development was observed in the general area surrounding the site.
- 2013:** No significant changes from 2010 were observed at the subject property, adjoining properties, or general area surrounding the site.
- 2017:** By 2017, an additional gravel driveway had been constructed at the central portion of the site. Additional stockpiles were apparent throughout the County Conservation Company facility.
- 2019 - 2020:** Based on review of aerial photographs obtained from Google Earth, County Conservation Company operations at the site ceased circa 2020, and the subject property currently consists of vacant land. By this time, Blackwood Barnsboro Road no longer traversed the northwestern portion of the subject property and had been redirected along the eastern boundary of the subject property.

4.5.3 USGS Topographic Maps

The United States Geologic Survey (USGS) *15 Minute Topographic Quadrangle – Philadelphia, Pennsylvania* maps dated 1891, 1894, 1896, 1898, 1906, 1920 and 1943 and the *7.5 Minute Topographic Quadrangle – Runnemede, New Jersey* maps dated 1952, 1967, 1981, 1994, 1995 and 2014 and the *30 Minute Topographic Quadrangle – Camden, New Jersey* map dated 1901 were reviewed to ascertain information regarding historic development of the subject property and the surrounding areas. Copies of the historic topographic maps are included in Appendix 6.

No structures were depicted at the subject property on the 1891 through 1920 topographic maps. Suspected residential buildings were depicted on the subject property and the adjoining properties on the 1943 map, however, these structures were not observed on the corresponding aerial photographs dated 1940 and 1944. The Lot 12 former residential structure was observed on the northern portion of the site on the 1952 through 1995 maps. Blackwood Barnsboro Road traversed the northwestern portion of the subject property since at least 1967. No structures were observed at the subject property on the 2014 map.

4.5.4 City Directory Search

Whitestone utilized the services of EDR to conduct an electronic search of business directories at approximately five-year intervals for the years spanning 1980 through 1993 (see Appendix 7). This search revealed that a business named Accu Med Hospital occupied the site address 100 Egg Harbor Road in 1980, 1985 and 1993. No evidence of the former Accu Med Hospital facility was identified in historical documents reviewed during this assessment. Based on review of aerial photographs, the 100 Egg Harbor Road portion of the subject property has been unimproved since at least 1931. Whitestone believes this listing to be erroneous.

4.5.5 Property Ownership/Chain of Title

A limited chain of title search was initiated in an attempt to determine past site usage and ownership. Whitestone reviewed the March 15, 2019 *ALTA Commitment for Title Insurance* prepared by the Chicago Title Insurance Company (File No. ACQ-9780L-17) and property tax files obtained from the State of New Jersey Assessment Records Search website. Copies of deeds available or provided indicate the following conveyances:

SECTION 5.0 Site Reconnaissance

5.1 Methodology and Limiting Conditions

Whitestone conducted a reconnaissance of accessible portions of the subject property on February 5, 2021. Whitestone's previous ESA reconnaissance was conducted on August 29, 2018. Existing site conditions were photographed (see Appendix 1) and are documented below. Suggestions for further investigation and/or remediation of the conditions identified in the following subsections are outlined in Section 7.0.

5.2 General Site Setting

The subject property comprises approximately 4.977 acres of vacant land located at 100 and 108 Egg Harbor Road in Washington Township and 203 Blackwood Barnsboro Road in Deptford Township, Gloucester County, New Jersey, Latitude 39.7831840 North, Longitude -75.1001340 West. The property is identified further as Block 7, portion of Lot 6.02; Block 7.04, Lot 6; and Block 386.12, Lot 12. Whitestone understands that the northwestern portion of the subject property is proposed for redevelopment with a 5,585-square feet Wawa food market, fueling canopy, USTs and associated fuel dispensers as depicted Stonefield's last revised January 8, 2021 *Site Plan C-5*. The southern portion of the subject property is proposed for development with a 3,235-square feet restaurant building, and the northeastern portion of the site will be improved with an aboveground SWM basin. The site location is shown in Figures 1 and 2 and illustrated in Appendix 1, Site Photographs.

General Site Information				
Site Reconnaissance				
Whitestone Personnel	Eric P. Harris			
Reconnaissance Date	February 5, 2021			
Weather Conditions	Rain/40°F			
Site Contact	None present during site reconnaissance			
Building Description				
Building Identification	Building Use	Approx. Construction Date	Number of Stories	Footprint Area (ft ²)
NA	NA	NA	NA	NA
Site Utilities				
Potable Water	Potable water in the subject area reportedly is supplied by Washington Township Municipal Utilities Authority			
Sanitary Wastewater	Sanitary waste water in the subject area reportedly is managed by the Township of Washington Department of Public Works			
Natural Gas	Natural gas in the subject area reportedly is provided by South Jersey Gas			

Electricity	Electricity in the subject area reportedly is provided by Jersey Central Power & Light (JCP&L)
Site Access/Roads	
Northeast	None
Northwest	None
Southeast	Blackwood Barnsboro Road
Southwest	Egg Harbor Road

5.3 Current Uses of the Property

The subject property comprises approximately 4.977 acres of vacant land currently prepared for commercial redevelopment. A vacant, lightly wooded, former residential property is situated in the northern portion of the subject property. An approximately four-inch layer of snow cover across the subject property prohibited a thorough evaluation of the ground surface during Whitestone's site reconnaissance.

5.4 Site Observations

The following table summarizes Whitestone's site reconnaissance observations. Affirmative responses (designated by an "X") are discussed in detail below.

Category	Site Features	Observed or Identified	Historic Known or Suspected	Identified as REC	Identified as BER	
Site Operations, Processes & Equipment	Emergency generators					
	Elevators					
	Compressors and/or blow down area					
	Hydraulic lifts					
	Dry cleaning					
	Photo processing					
	Ventilation hoods and/or incinerators					
	Sanitary wastewater treatment systems					
	Process/industrial wastewater treatment systems					
	Water treatment systems					
	Heating and/or cooling systems					
	Paint booths					
	Sub-grade mechanic pits					
	Wash-down areas or carwashes					
	Vehicle repair or maintenance					
	Pesticide/herbicide production, mixing, storage and/or application			X		X
	Printing operations					
	Metal finishing (e.g., electroplating, chrome plating, galvanizing, etc.)					
	Salvage or recycling operations					
	Oil, gas or mineral production					
Hydraulic trash compactor/equipment						

Category	Site Features	Observed or Identified	Historic Known or Suspected	Identified as REC	Identified as BER
	Railroad tracks				
	Manufacturing operations/equipment				
	Other processes or equipment				
Petroleum, Chemical or Waste Storage, Drainage or Collection	On-site use, handling or storage of petroleum or hazardous materials and/or generation of hazardous wastes				
	Aboveground storage tanks (ASTs)				
	Drums and/or containers \geq 5 gallons		X		
	USTs or associated equipment		X		
	Sumps, cisterns, French drains, catch basins and/or dry wells				
	Grease traps				
	Septic tanks and/or leach fields		X		
	Oil/water separators, clarifiers, sand traps, triple traps and/or interceptors				
	Pipeline markers				
	Interior floor drains				
	Process wastewater piping				
Potential PCB Equipment	Transformers and/or capacitors	X			
	Fluorescent light fixtures				
	Oil-filled hydraulic, electrical or other suspect equipment				
Contaminant Releases or Potential Releases	Stressed vegetation				
	Stained soil				
	Stained pavement or surfaces				
	Leachate and/or waste seeps				
	Trash, debris and/or other discarded solid wastes				
	Dumping or disposal areas				
	Construction/demolition debris and/or stockpiled material		X		
	Surface water discoloration, odor, sheen and/or free floating product				
	Strong, pungent or noxious odors				
	Exterior pipe discharges and/or other effluent discharges				
	Historic fill	X			
Other evidence of on-site contamination					
Other Suspect or Notable Site Features	Surface water bodies				
	Quarries or pits				
	Wastewater lagoons				
	Wells		X		X
	Potential vapor intrusion or off-site contamination migration concern		X		
	Potential for PFAS contaminants				

5.4.1 Site Operations, Processes & Equipment

Pesticide/Herbicide Production, Storage and/or Application

Historical sources reviewed by Whitestone revealed that the subject property, adjacent properties and/or the general area surrounding the site were used for agricultural purposes dating back to at least 1931 to 1959 (or later). Such activities may have resulted in pesticide impacts to surficial and shallow subsurface soils. During Whitestone's Phase II SI, the pesticide dieldrin was detected in one soil sample at a concentration exceeding its NJDEP DIGWSSL. Subsequent SPLP analyses confirmed that dieldrin was not detected in the soil sample above the laboratory RL or the NJDEP Default Leachate Criterion.

5.4.2 Petroleum, Chemical or Waste Storage, Drainage or Collection

Historic Structures

Historical sources reviewed by Whitestone indicated that a residential dwelling occupied the northern portion (Lot 12) of the subject property between at least 1931 until 2003. The former structure may have utilized an UST for on-site storage and consumption of heating oil. The site owner indicated that a cesspool and potable well were abandoned during demolition, however, no records regarding the heating system for the former structure were available for review. Whitestone conducted a geophysical survey at the subject property on November 19, 2018, and no anomalies were identified. In the unlikely event that subsurface features are encountered, any abandoned USTs must be removed and evaluated for contamination in accordance with NJDEP regulations, remnant septic components must be closed in accordance with local Health Department guidelines, and wells must be abandoned by a licensed well driller.

Drums, Barrels and/or Containers \geq 5 Gallons

During Whitestone's previous reconnaissance on August 29, 2018, approximately 100 275-gallon plastic totes containing or formerly containing mulch colorant were staged along driveway areas and in the vicinity of stockpiles on the subject property. At that time, the majority of these containers were empty and were stored in an environmentally sound fashion with no evidence of improper use or release. Since 2020, the subject property has not operated as a portion of the County Conservation Company, and the totes were no longer present on site during the February 5, 2021 reconnaissance.

5.4.3 Potential PCB-Containing Equipment

Transformers and/or Capacitors

Two pole-mounted electric transformers were observed in the northwestern portion of the subject property during Whitestone's site reconnaissance. No evidence of staining or release was observed in connection with these transformers. However, based on the approximate date of development of the adjacent properties, the dielectric fluid in these transformers could contain PCBs. If not intended for

continued use, these transformers should be evaluated for PCB content and removed by JCP&L, the electric utility provider, for off-site management in accordance with applicable waste management regulations.

5.4.4 Evidence of Potential Contaminant Release

Construction/Demolition Debris and/or Stockpiled Material

During Whitestone’s previous reconnaissance on August 29, 2018, topsoil and mulch stockpiles were observed throughout the eastern and southern portions of the subject property, and an asphalt roof shingle stockpile was observed to the east of the site. Since 2020, the subject property has not operated as a portion of the County Conservation Company, and the stockpiles previously observed on site were no longer present during the February 5, 2021 reconnaissance.

Historic Fill

During Whitestone’s 2019 Phase II SI, monitor well MW03, advanced in the northern portion of the site, encountered fill material to a depth of 5.5 fbs consisting of apparent non-native soil without debris. One soil sample collected from MW03 at the 5.0 fbs to 5.5 fbs interval did not exhibit concentrations of VO_s, SVO/BNs, PCBs, and TAL metals exceeding NJDEP’s most-stringent standards. Previously excavated/quarried areas may have been backfilled with imported, non-native material.

5.4.5 Other Suspect or Notable Site Features

Wells

In conjunction with Whitestone’s April 2, 2019 Phase II SI, three groundwater monitoring wells were installed at the subject property. The wells were not observed on February 5, 2021 due to the presence of snow cover.

5.4.6 Current Uses of Adjoining Properties and the Surrounding Area

The current adjoining property uses are summarized below.

Direction	Description
North	The Bank of Princeton
South	Xpressmart, KinderCare, and the Washington Township Water Tower
East	County Conservation Company
West	Commercial development including gasoline service station properties

SECTION 6.0

Interviews

Telephone and/or in-person interviews conducted with the following public officials and knowledgeable site representatives are summarized below.

6.1 Interviews with Site Owner

Name, Title: John Petrongolo, Owner
Representing: JPC Group, Inc.
Date & Time Contacted: September 12, 2018; 2:30 PM (updated February 5, 2021; 3:00 PM)
Type of Interview: Phone

Whitestone interviewed Mr. Petrongolo on September 12, 2018 for the original ESA and again on February 5, 2021 in conjunction with the ESAU. Mr. Petrongolo owned the subject property since the 1980's, and the County Conservation Company has occupied the site since approximately 1991. Previously, the site primarily operated as a borrow pit for sandy soils. According to Mr. Petrongolo, a cesspool and a potable water well were abandoned during demolition of the former residential dwelling on Lot 12 in the 2000's, however, no USTs were encountered during the demolition process. Furthermore, Mr. Petrongolo confirmed that no potable or water supply wells currently are located at the subject property. Prior to redevelopment of Blackwood Barnsboro Road in 2020, multiple 275-gallon mulch colorant totes were staged on the subject property, however, the majority of these totes reportedly were empty, according to Mr. Petrongolo.

6.2 Interviews with Key Site Manager

Information regarding the subject property was provided by the Site Owner (see Section 6.1 above).

6.3 Interviews with Occupant(s)

Information regarding the subject property was provided by the Site Owner (see Section 6.1 above).

6.4 Interviews with Local Government Officials

No interviews with local government officials were conducted during this ESAU.

6.5 Interviews with Others

No additional interviews were conducted during this assessment.

SECTION 7.0

Findings, Conclusions & Recommendations

Whitestone Associates, Inc. has conducted a Phase I ESAU in general accordance with the scope and limitations of ASTM Standard Practice E1527-13 and the conditions of Section 2.0 of this report of the vacant parcels located at 100 and 108 Egg Harbor Road in Washington Township and 203 Blackwood Barnsboro Road in Deptford Township, Gloucester County, New Jersey. The Phase I ESAU activities did not identify RECs, CRECs, and/or HRECs that warrant further consideration.

7.1 Findings

7.1.1 Summary of RECs

This assessment revealed no evidence of RECs in connection with the subject property.

7.1.2 Summary of CRECs

This assessment revealed no evidence of CRECs in connection with the subject property.

7.1.3 Summary of HRECs

This assessment revealed no evidence of HRECs in connection with the subject property.

7.1.4 Summary of BERs

Items that are not identified as RECs, CRECs, or HRECs however, may require limited investigation or corrective action as BERs include the following:

- ▶ Historic sources reviewed by Whitestone revealed that the subject property, adjacent properties and/or the general area surrounding the site were used for agricultural purposes dating back to at least 1931 to 1959 (or later). Such activities may have resulted in pesticide impacts to surficial and shallow subsurface soils. During Whitestone's Phase II SI, the pesticide dieldrin was detected in one soil sample at a concentration exceeding its NJDEP DIGWSSL. Subsequent SPLP analyses confirmed that dieldrin was not detected in the soil sample above the laboratory RL or the NJDEP Default Leachate Criterion. No further action is proposed to address this BER unless export of surplus soil is anticipated during construction. If export is anticipated, supplemental characterization sampling and analyses and regulated off-site management may be required.

- ▶ Three groundwater monitoring wells were installed at the subject property in conjunction with Whitestone's April 2, 2019 Phase II SI. If not intended for continued use, the wells must be abandoned by a New Jersey-licensed driller.

7.2 Opinion

The BERs noted above are not anticipated to present a significant threat of future liability, however, could represent premium costs and/or cause timing delays during implementation of the proposed site redevelopment plans.

7.3 Conclusions & Recommendations

This assessment revealed no evidence of RECs, CRECs or HRECs warranting further action in connection with the subject property.

7.4 Limiting Conditions/Deviations & Data Gaps/Failures

Whitestone has conducted a Phase I ESAU of the subject property in conformance with the scope and limitations of ASTM Practice 1527-13 with the following exceptions:

- ▶ The Phase I ESAU historic research failed to document conditions pre-dating initial development of the Lot 12 portion of the subject property;
- ▶ OPRA responses have not been received from Gloucester County, Washington Township, or Deptford Township;
- ▶ Current recorded land title records, including an environmental lien search, were not provided by the User for review; and
- ▶ An approximately four-inch layer of snow cover across the subject property prohibited a thorough evaluation of the ground surface during Whitestone's site reconnaissance.

The data gaps/failures noted above are not likely to represent significant missing/incomplete information that, if available, would alter the opinion of the Environmental Professional.

SECTION 8.0

Non-Scope Services/Considerations

8.1 Asbestos Containing Materials (ACM)

Structures pre-dating 1980 (and even some buildings constructed after 1980) may have been built using asbestos containing construction or insulation materials. No structures or potential sources of ACM currently are located at the subject property.

8.2 Lead Based Paints (LBP)

Structures pre-dating 1980 (and even some buildings constructed after 1980) may be coated with LBP. No structures or potential sources of LBP currently are located at the subject property.

8.3 Mold/Microbial Growth

No structures or potential sources of mold/microbial growth currently are located at the subject property.

8.4 Wetlands

No surface water or vegetation indicative of suspected wetland areas were observed on-site during Whitestone's field reconnaissance. Additionally, the subject property was not described on the U.S. Fish and Wildlife Service *National Wetlands Inventory Database* map as a mapped wetlands area. A wetlands survey/delineation was beyond the scope of this Phase I ESAU.

SECTION 9.0 Environmental Professionals

9.1 Signatures

The following Whitestone personnel were responsible for conducting the Phase I ESAU of the subject site and preparing the information presented herein.

I, D. Wriston Phillips, declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and conducted the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State- and tribal - equivalent CERCLIS

SHWS: Known contaminated sites in New Jersey except those associated with Bureau of Underground Storage Sites (BUST)

A review of the SHWS list, as provided by EDR, and dated 11/24/2020 has revealed that there are 12 SHWS sites within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

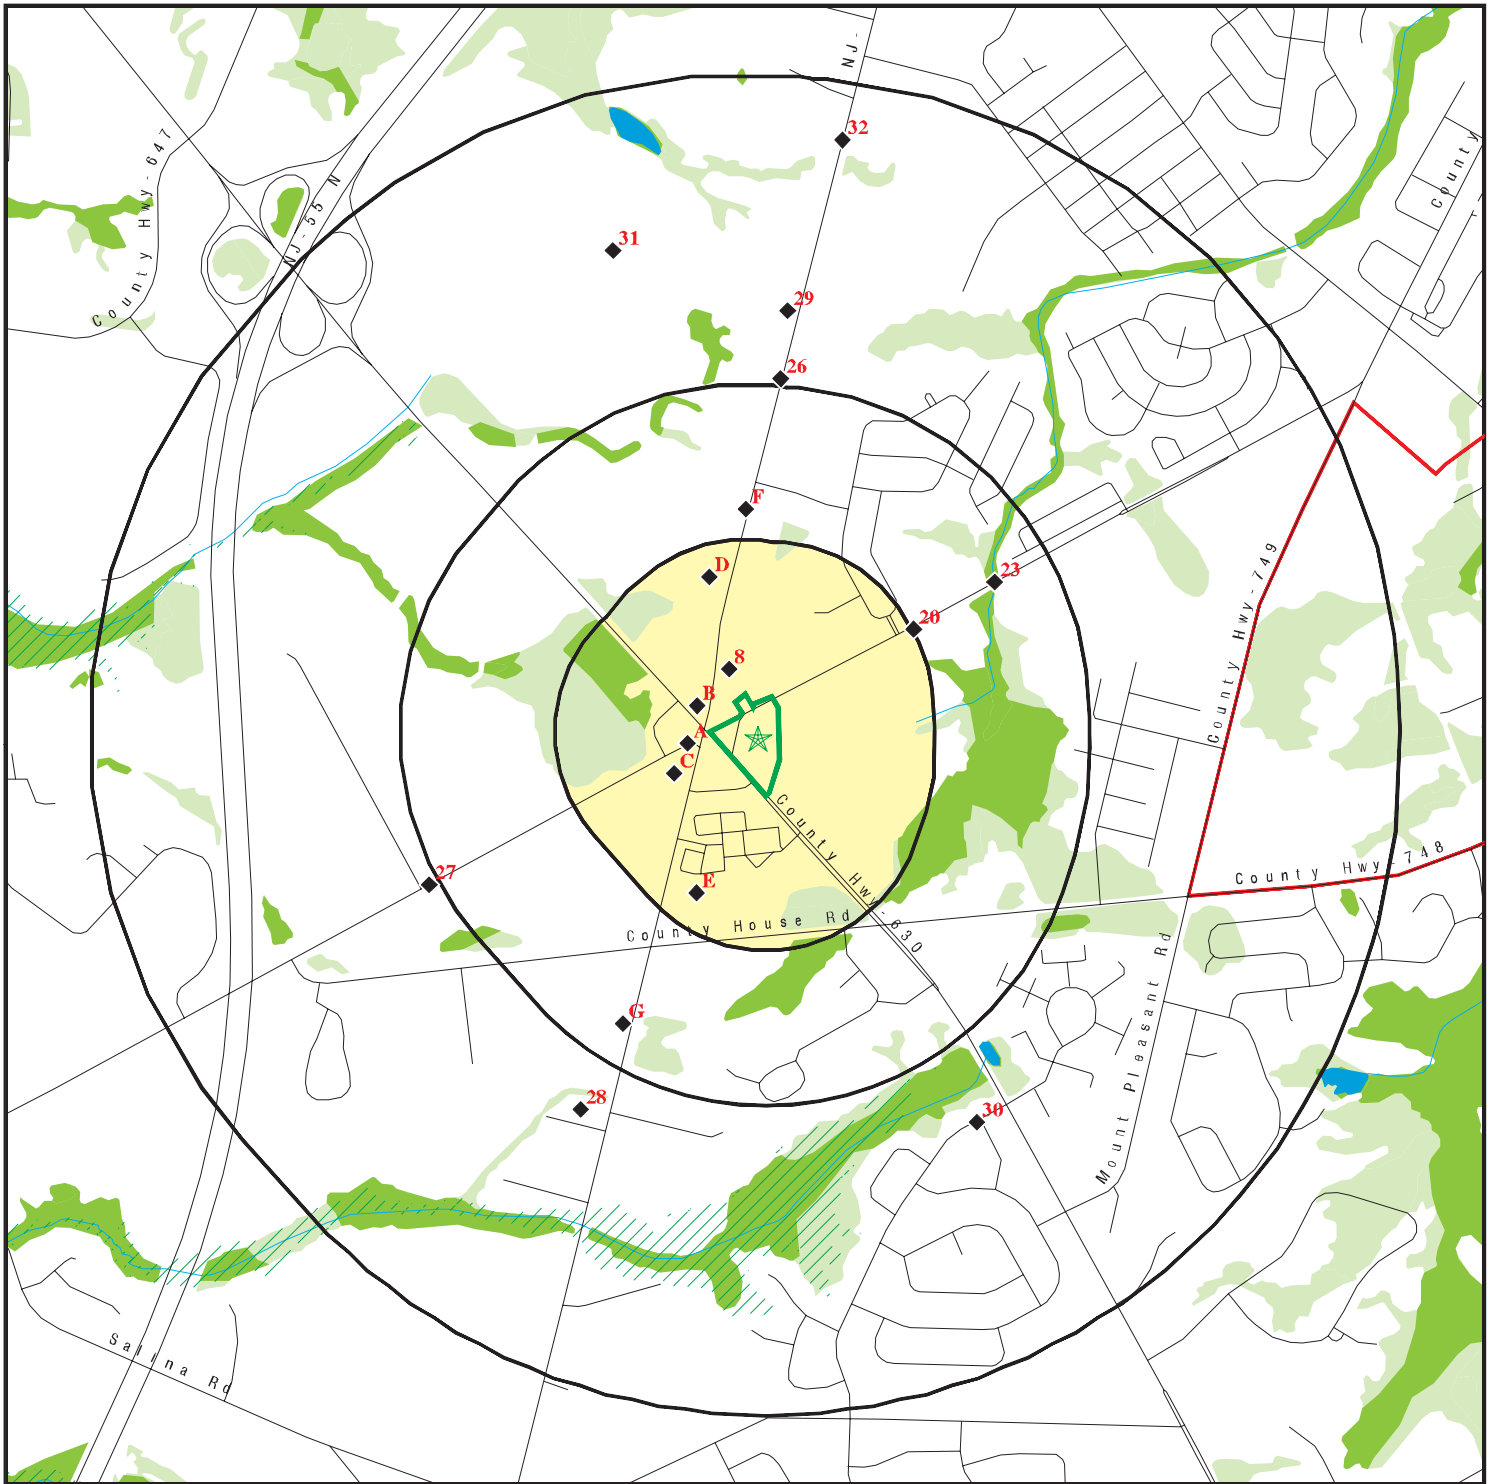

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
MULLARYS FAST FUELS	108 DELSEA DR	WSW 0 - 1/8 (0.035 mi.)	A2	10

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/28/2020	Source: EPA
Date Data Arrived at EDR: 11/05/2020	Telephone: N/A
Date Made Active in Reports: 11/25/2020	Last EDR Contact: 01/14/2021
Number of Days to Update: 20	Next Scheduled EDR Contact: 04/12/2021
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/28/2020	Source: EPA
Date Data Arrived at EDR: 11/05/2020	Telephone: N/A
Date Made Active in Reports: 11/25/2020	Last EDR Contact: 01/14/2021
Number of Days to Update: 20	Next Scheduled EDR Contact: 04/12/2021
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/28/2020

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/28/2020	Source: EPA
Date Data Arrived at EDR: 11/05/2020	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (212) 637-3660
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 12/17/2020

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (212) 637-3660
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 12/17/2020

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (212) 637-3660

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

SHWS: Known Contaminated Sites in New Jersey

The Known Contaminated Sites in New Jersey includes sites under the purview of the Site Remediation Program which have contamination present at levels greater than the applicable cleanup criteria for soil and/or groundwater standards. The sites appearing in Known Contaminated Sites in New Jersey are classified as either active, where the site is assigned to a specific remedial program area, or pending, where the site is awaiting assignment to a specific remedial program area. Sites where no further action (NFA) designation has been given are not included in this report unless there are other areas of identified contamination which have not been remediated. This report includes sites being remediated under all of the various regulatory programs administered by the Site Remediation Program such as: Federal Superfund Program, Federal Resource Conservation and Recovery Act (RCRA), New Jersey's Industrial Site Recovery Act (ISRA), New Jersey's Underground Storage of Hazardous Substances Act, New Jersey's Spill Compensation and Control Act, New Jersey's Solid Waste Management Act, New Jersey's Water Pollution Control Act.

HWS RE-EVAL: Site Re-Evaluation Report

The locations were removed from the Known Contaminated Sites list for a variety of reasons. Some of the sites were taken off the list because they were inactive, some were not assigned a case worker and some were no longer contaminated. Inspectors from the DEP are now undertaking a full re-evaluation of each of the locations statewide. That includes visual and environmental tests to see whether contamination still exists.

Date of Government Version: 09/20/2007

HIST HWS: Known Contaminated Sites Listing

The Known Contaminated Sites in New Jersey report is a municipal listing of sites where contamination of soil and/or ground water is confirmed at levels greater than the applicable cleanup criteria or standards. Remedial activities are underway or required at the sites with an on-site source(s) of contamination and at locations where the source(s) of contamination is unknown. Sites with completed remedial work that require engineering and/or institutional controls have reporting measures in place to ensure the effectiveness of past actions, and some include maintenance and/or monitoring

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Local Land Records

LIENS: Environmental LIENS

A listing of properties with environmental liens. The listing includes sites from the Site Remediation & Waste Management Program Sites where the Department has placed either a 1st Priority or Regular Spill Fund Lien against. 1st Priority Type Lien - a lien placed against the property where the discharge occurred providing that the owners of the property have some responsibility towards the discharge. First Priority Lien is superior to other types of liens. Non-Priority (Regular) Type Lien - a lien placed against the Responsible Party & their revenues and all real and personal property, other than the real property comprising the location of the discharge.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

GW CONTAM AREAS: Groundwater Contamination Areas

This data identifies those sites where groundwater contamination has been identified and, where appropriate, the NJDEP has established a Classification Exception Area (CEA). CEAs are institutional controls in geographically defined areas within which the New Jersey Ground Water Quality Standards (NJGWQS) for specific contaminants have been exceeded. When a CEA is designated for an area, the constituent standards and designated aquifer uses are suspended for the term of the CEA. This data layer contains information about areas in the state which are specified as the Currently Known Extent (CKE) of ground water pollution. CKE areas are geographically defined areas within which the local ground water resources are known to be compromised because the water quality exceeds drinking water and ground water quality standards for specific contaminants.

ISRA: ISRA Database

The ISRA process begins with determining if the Act applies to your type of business and transaction. The provisions of ISRA only apply to industrial establishments. What is an industrial establishment? The term "industrial establishment" refers to the type of business operations and transactions that would subject a facility to review under ISRA.

An industrial establishment must meet each of the following three criteria: The place of business or real property at which such business is conducted, having a North American Industry Classification System (NAICS) code listed in N.J.A.C. 7:26 B - Appendix C subject to the specified exceptions and limitations. The place of business must have been engaged in operations on or after December 31, 1983; and The place of business must involve the generation, manufacture, refining, transportation, treatment, storage, handling, or disposal of hazardous substances or hazardous wastes.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

RGA LUST: Recovered Government Archive Leaking Underground Storage Tank

The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the New Jersey Department of Environmental Protection in New Jersey.

Date of Government Version: N/A	Source: New Jersey Department of Environmental Protection
Date Data Arrived at EDR: 07/01/2013	Telephone: N/A

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Elevation:	119 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	6035327 RUNNEMEDE, NJ
Version Date:	2014

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
34015C0111E	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>

34015C0114E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
RUNNEMEDE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	0 - 1/8 Mile West
Site Name:	Blackwood-Barnsboro Road Property
Site EPA ID Number:	NJ0001118892
Groundwater Flow Direction:	Southwest
Inferred Depth to Water:	100 feet.
Hydraulic Connection:	Confining layers are present between the surficial aquifer and lower aquifers.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Udorthents

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 1.4	Max: 5.5 Min: 5.1
2	11 inches	72 inches	loamy sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 1.4	Max: 5.5 Min: 5.1

Soil Map ID: 2

Soil Component Name: Sassafras

Soil Surface Texture: loamy sand

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

5	59 inches	79 inches	gravelly loamy coarse sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.14 Min: 14.11	Max: 5 Min: 3.6

Soil Map ID: 8

Soil Component Name: Buddtown

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 30 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14.11 Min: 4.23	Max: 5.5 Min: 3.5
2	53 inches	64 inches	coarse sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14.11 Min: 4.23	Max: 5.5 Min: 3.5
3	33 inches	40 inches	loamy coarse sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14.11 Min: 4.23	Max: 5.5 Min: 3.5
4	11 inches	25 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14.11 Min: 4.23	Max: 5.5 Min: 3.5
5	9 inches	11 inches	very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14.11 Min: 4.23	Max: 5.5 Min: 3.5

Soil Map ID: 10

Soil Component Name: Marlton

Soil Surface Texture: clay

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 46 inches

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

Source: Department of Environmental Protection

Telephone: 609-984-2243

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

New Jersey Public-Community Water-Supply Wells

Source: Department of Environmental Protection, Geological Survey

Telephone: 609-984-6587

New Jersey Ambient Ground Water Quality Network Data

Source: Department of Environmental Quality

Telephone: 609-984-6587

Ambient Groundwater Quality of the New Jersey Part of the Newark Basin. Natural groundwater quality in the Newark Basin summarize natural groundwater quality in sedimentary bedrock formations of the Newark basin part of the Piedmont physiographic province of New Jersey.

STORET Water Quality Monitoring Stations

Source: Department of Environmental Protection

Telephone: 609-984-6831

STORET maintains the locations of water quality monitoring stations from NJDEP's NJ STORET (Modernized) database.

A station is a location at which a data collection event takes place, such a collection of a field sample, measurement of field parameters or evaluation of environmental habitats.

Water Well Permit Information

Source: Department of Environmental Protection

Telephone: 609-984-6831

Permits to drill wells. Once constructed, the driller must submit a well record document with the as-built description of the well. Drillers also submit a well abandonment report whenever a well has been decommissioned.

OTHER STATE DATABASE INFORMATION

RADON

State Database: NJ Radon

Source: Department of Environmental Protection

Telephone: 609-984-5425

Radon Test Results

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Access to Government Records Under the New Jersey Open Public Records Act (N.J.S.A. 47:1A-1 et seq.)

1. The fees for duplication of a government record are specified below. We will notify you of any special charges, special service charges or other additional charges authorized by State law or regulation before processing your request. Payment shall be made by check or money order payable to the State of New Jersey and mailed to the address specified below.

Hard Copies:
Letter & Legal size = \$0.05 per page
Oversized Maps (Color) = \$5.00 per map
Oversized Maps (B&W) = \$3.00 per map

Electronic Records: CDs = \$0.55 per CD
DVDs = \$0.55 per DVD

2. Pursuant to OPRA (C.47:1A-5c & C47:1A-5d), the Department will apply special service charge for any extraordinary expenditure of time and effort to accommodate a request. The special service charge will be based on the actual direct cost of providing the records. The requester shall have the opportunity to review and object to the charge prior to it being incurred; however, in the event the requester objects to the special service charge, the request will be closed and access to the records will not be granted.
3. By law, the Department must notify you that it grants or denies a request for access to government records within seven business days after the custodian of the record requested receives the request, provided that the record is currently available and not in storage. If the record requested is not currently available or is in storage, the custodian will advise you within seven business days when the record can be made available and the estimated cost. You may agree with the custodian to extend the time for making records available, or granting or denying your request.
4. You may be denied access to a government record if your request would substantially disrupt agency operations and the custodian is unable to reach a reasonable solution with you.
5. If the Department was unable to comply with your request for access to a government record, the custodian will indicate the reasons for denial on the request form.
6. Except as otherwise provided by law or by agreement with the requester, if the custodian of the record requested fails to respond to you within seven business days of receiving a request form, the failure to respond will be considered a denial of your request.
7. **Resolution of Disputed Findings:**

In the event that a requester does not agree with the Department's record response, the requester should:

No Records - Reexamined the request details to evaluate if all of the information was provided that could aid the Department in locating records. The Department's ability to identify records of interest is in direct correlation to matching the Department information with the information provided on the request. Such important identifiers are Facility/Site Name, Address, Case #, Permit #, Block/Lot.

Denial - If your request for access to a government record has been denied or unfilled within the time permitted by law, you have a right to challenge the decision by the Department to deny access. The Department denies access to records only when those records do not meet the definition of a government record and/or public access is not allowed pursuant to the law. At your option, you may either:

- a. Contact the Office of Record Access to re-visit the matter or provide further explanation.
- b. Institute a proceeding in the Superior Court of New Jersey
- c. File a complaint in writing with the Government Records Council (GRC). You may contact the GRC by toll-free telephone at 866-850-0511, by mail at PO Box 819, Trenton, NJ, 08625, by e-mail at grc@dca.state.nj.us, or at their web site at www.state.nj.us/grc. The Council can also respond to other questions about the law.

8. Information provided on this form may be subject to disclosure under the Open Public Records Act.

If the an individual was specified above, the individual was DEP Licensed, please specify the license type the individual holds:	License Type:

The New Jersey Department of Environmental Protection has responded to your submitted Open Public Records Act (OPRA) record request. The following information will help you understand the response and your next available actions.

Tracking #: This is the Department's assigned Tracking # to your OPRA record request, which should be used in all corresponding matters.

Record Request Response:

- **In Progress** – Based on the nature of the request, the records sought, and/or the manner to which the records may exist, the Department requires additional time to investigate and respond to the request.
- **Filled** – Based on the information provided in your request, the Department was able to investigate and respond to your record request.
- **Denied** – Based on the nature of the request and/or the records sought, the Department has denied your request pursuant to a specific exemption(s) cited in N.J.S.A. 47:1A-1 seq.
- **Partial** – The Department has identified both responsive government records and records being denied based on the nature of the request and/or the records sought, that do not meet the definition of a government record pursuant to a specific exemption(s) cited in N.J.S.A. 47:1A-1 seq.

Disposition Notes: Provides detailed information concerning the Department's response to your request.

Accessing Records: Dependent on the volume of records and your interest, there are five (5) methods available to access the responsive government records:

- **File Review** – Schedule a file review with the Department to directly access the records and take notes or tag records of interest for copying. Copying can be performed by either the Department's onsite Copying Unit at State duplication fee costs or by the requester employing a Copy Vendor Service. If there are records stored in archives, a five-day processing period will be included prior to scheduling a review.
- **Copy Request** – All records of interest will be copied by the Department's onsite Copying Unit at State duplication fee costs unless a Copy Vendor Service is employed.
- **Electronic Records Request** – Dependent on the size & nature of the e-records, the Department will email the records or provide a CD or DVD.
- **Fax Request** – Based on the number of pages, the Department faxes the responsive records.
- **Web Access** – The responsive records can be accessed directly through the Department's web site. Web address will be provided.

Access to Government Records Under the New Jersey Open Public Records Act (N.J.S.A. 47:1A-1 et seq.)

1. The fees for duplication of a government record are specified below. We will notify you of any special charges, special service charges or other additional charges authorized by State law or regulation before processing your request. Payment shall be made by check or money order payable to the State of New Jersey and mailed to the address specified below.

Hard Copies:
Letter & Legal size = \$0.05 per page
Oversized Maps (Color) = \$5.00 per map
Oversized Maps (B&W) = \$3.00 per map

Electronic Records: CDs = \$0.55 per CD
DVDs = \$0.55 per DVD

2. Pursuant to OPRA (C.47:1A-5c & C47:1A-5d), the Department will apply special service charge for any extraordinary expenditure of time and effort to accommodate a request. The special service charge will be based on the actual direct cost of providing the records. The requester shall have the opportunity to review and object to the charge prior to it being incurred; however, in the event the requester objects to the special service charge, the request will be closed and access to the records will not be granted.
3. By law, the Department must notify you that it grants or denies a request for access to government records within seven business days after the custodian of the record requested receives the request, provided that the record is currently available and not in storage. If the record requested is not currently available or is in storage, the custodian will advise you within seven business days when the record can be made available and the estimated cost. You may agree with the custodian to extend the time for making records available, or granting or denying your request.
4. You may be denied access to a government record if your request would substantially disrupt agency operations and the custodian is unable to reach a reasonable solution with you.
5. If the Department was unable to comply with your request for access to a government record, the custodian will indicate the reasons for denial on the request form.
6. Except as otherwise provided by law or by agreement with the requester, if the custodian of the record requested fails to respond to you within seven business days of receiving a request form, the failure to respond will be considered a denial of your request.
7. **Resolution of Disputed Findings:**

In the event that a requester does not agree with the Department's record response, the requester should:

No Records - Reexamined the request details to evaluate if all of the information was provided that could aid the Department in locating records. The Department's ability to identify records of interest is in direct correlation to matching the Department information with the information provided on the request. RE: OPRA Request – *“Whitestone Associates Inc. is conducting a Phase I environmental Site Assessment at the above referenced location. Whitestone requests copies of any available files addressing or pertinent to environmental investigations, underground storage tanks (USTs), corrective actions, containment releases, incidents, fires, hazardous materials storage, citations, notices of violation, or other areas of concern at the above referenced property.”*

Dear Jenna,

In response to your OPRA Request received February 5, 2021, we have reviewed your request and have found that we do not have any documents responsive to same.

As a result of our search, subsequent findings and this response to your request, we have marked your OPRA request received February 5, 2021 as closed.

Thank you for your time.

Sincerely,

Dina L. Zawadski, RMC/CMC
Township Clerk
DLZ/mld

Additional pertinent OPRA response information will be supplied in a supplement to this report when, and if, it becomes available.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Whitestone Associates, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

USER INFORMATION

Company Name: Ferber Construction Management North, LLC.
Contact Name: Mike Murphy
Street Address: 194 Mount Airy Road
Basking Ridge, NJ 07920
Phone Number: 610-656-6530
Email Address: mmurphy@ferbercompany.com

Please provide an answer to each of the following questions.

1. Did a search of *recorded land title records* identify an environmental lien filed or recorded against the property under federal, tribal, state or local law?

Not to my knowledge.

2. Did a search of *recorded land title records* identify any activity and use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?

Not to my knowledge.

3. Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

No.

Phase I Environmental Site Assessment
User Questionnaire
ASTM E1527-13, APPENDIX X3
PAGE 2 OF 2

4. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Yes, the purchase price is fair market value in my opinion.

5. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as User,

(a) Do you know the past uses of the property?

No knowledge of past uses of the property.

(b) Do you know of specific chemicals that are present or once were present at the property?

No.

(c) Do you know of spills or other chemical releases that have taken place at the property?

No.

(d) Do you know of any environmental cleanups that have taken place at the property?

No.

6. Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of releases at the property?

No.

Mr. Phillips is Licensed Site Remediation Professional (LSRP) and Certified Hazardous Materials Manager (CHMM) with over 18 years of experience in environmental consulting and project management. He has an in-depth knowledge of ASTM E-1527-13 standards for Phase I and II Environmental Site Assessments (ESAs) and New Jersey Department of Environmental Protection (NJDEP) Technical Requirements for Site Remediation (TRSR), Site Remediation Reform Act (SRRRA), and Administrative Requirements for the Remediation of Contaminated Sites (ARRCS).

Mr. Phillips has performed and managed hundreds of Phase I Environmental Site Assessments (ESAs), Phase II Site Investigation (SIs), and remediation projects at sites throughout New Jersey and the Mid-Atlantic region. His expertise includes site development, remediation construction management, operation, maintenance, and optimization of In-situ Chemical Oxidation, soil vapor extraction, air sparging, dual phase extraction, DNAPL/LNAPL recovery, and groundwater extraction treatment systems.

REPRESENTATIVE EXPERIENCE

- LSRP and/or the Project Manager on multiple industrial, commercial, retail and redevelopment sites throughout New Jersey.
- LSRP for a redevelopment sites subject to New Jersey's *Industrial Site Recovery Act* (ISRA) in Newark, NJ. Responsible for LSRP services on the ISRA compliance, Remediation Funding Source, Preliminary Assessment, Site Investigation, Remedial Investigation and Remedial Activities.
- LSRP for a Brownfields Redevelopment Site in Jersey City, NJ. Responsible for providing LSRP services on the Remedial Investigations, Workplans, and Remedial Activities.
- LSRP for a bulk fuel storage facilities located in Atlantic Highlands, NJ. Responsible for all remedial phases, budgeting and client relations.
- LSRP for a dry cleaner in Red Bank, NJ. Responsible for LSRP services on the Remedial Investigations, Vapor Intrusion Investigation & Mitigation, Workplans and Remedial Activities.
- LSRP for a child care facility in Trenton, NJ. Responsible for conduction Preliminary Assessments and Indoor Health Assessments.
- LSRP for a former retail gas and service station in Ocean, NJ. Responsible for LSRP oversight on the Preliminary Assessment, Site Investigation, Remedial Investigation and Remedial Activities.
- LSRP for a former trucking transfer station in Port Norris, NJ. Responsible for LSRP oversight on Site Investigation, Remediation Investigation, Remedial Activities, Potable Well Investigation and Potable Well Treatment Systems.
- LSRP of Record for multiple Underground Storage Tanks (UST) and/or Unregulated Heating Oil Tank (UHOT) Closures, Investigations & Remedial Activities.
- Project Manager for a \$5,000,000 mechanical installation of a DNAPL Recovery and GWTS at a former MGP Site in Pelham Manor, NY.
- Project Manager for the construction, commissioning and startup of a metals precipitation GWTS at a former industrial facility in Jersey City, NJ.
- Project/Construction Manager for an ISCO system at a former chemical manufacturing facility in Hoboken, NJ.
- Managed and provided data acquisition support for a hydro-electric power plant ecological study in Hawley, PA.

AREAS OF EXPERTISE

Environmental Regulatory Compliance
Phase I Environmental Site Assessments
Phase II Site Investigations
Sampling Program Implementation
Soils Evaluation and Interpretation
Data Collection and Assessment

Mr. Harris performs due diligence investigations including Phase I Environmental Site Assessments (ESAs) and Phase II Site Investigations (SIs). He is skilled in all aspects of groundwater, soil, sediment, and air sample collection, data management, and reporting.

Prior to joining Whitestone, Mr. Harris was a Staff Scientist for Environmental Consulting, Inc. and a Project Manager for the Bristol-Myers Squibb Green Lab Certification Program.

REPRESENTATIVE EXPERIENCE

- Perform environmental due diligence investigations including Phase I ESAs and Phase II SIs for retail, commercial, and industrial properties throughout Whitestone's multi-state service region. Review historical reference documents, Sanborn Fire Insurance maps, aerial photographs, city directories, etc. Conduct site inspections and author associated reports.
- Supervise the installation of Geoprobe borings, test pits, monitoring wells, and soil vapor points to facilitate soil, sediment, and groundwater sampling and analyses.
- Perform multimedia sampling (soil, groundwater, sludge, vapor). Interpret laboratory data and field measurements to delineate the extent and direction of contamination. Prepare analytical summary tables and associated SI and Remedial Investigation (RI) reports.
- Performed over 250 ESAs managing up to 10 projects simultaneously as an ECI Staff Scientist. Reviewed, analyzed, and summarized previous environmental reports to identify outstanding areas of concern. Collaborated with real estate, banking, and brokerage entities and recommended corrective actions to address client needs.
- Worked with cross-functional team (Facilities, EHS, Chemistry) to design and implement company-wide pilot initiative to improve environmental practices for laboratory employees as Project Manager for the Bristol-Myers Squibb Green Lab Certification Program. Maintained environmental employee survey, improving data on current environmental practices. Contributor to Bristol-Myers Squibb reaching 2015 Sustainability Goals to reduce energy costs; recognized by management.
